

Photo Editing Layers Project

Directions

In this project, you will work in Pixlr to create a photo with 4-6 layers. This project will help you understand what a layer is, and how to edit layers. You need to find a background and add several layers to it like the example in the video from class.

**Example Video is located on the NottinghamTech Digital Photography Project main page.*

Requirements

Create a photo with 4-6 layers that uses a variety of tools in Pixlr. You can add filters, lighting, text, temperature, blur, objects, shapes, etc. Be creative with this project, try something different!

Submit

A presentation that has:

- All individual photos used for the layers
- The final photo
- A description of the process
- Answers to the questions

Questions:

1. How many layers are in your project?
2. What was the hardest part of this project?
3. When determining what layers to use how did you decide which were the best effects/ backgrounds?
4. Do you think this type of photo editing is considered "cheating" to make your photos better? Explain Why or Why not?

*All Project photos and answers should be done in PowerPoint or Word and then emailed to or Shared to BEnglish@scsd.us
