We are proud to bring you our new flowering and foliage quart perennial program. We have spent months planning varieties and working with suppliers to bring you some of the newest and most innovative plant varieties available. In our new perennial quart size we can offer the best performing plants of their respective species at an affordable cost. We can now offer select Proven Winner Perennials, and other new species for 2023 from a wide variety of plant breeders in a pot size smaller than a 1 gallon pot. We sincerely hope that you enjoy all the new color, as much as we have enjoyed curating this selection for you!

Sincerely,

The Engles Farm and Greenhouses Team

Pruning Type : 3

Pruning Type 2 :

In this group, all the first flowering comes from last season's ripened stems. In early Spring watch for swelling leaf buds beginning to show. Cut all dead material off above these swelling buds. Be sure all growth is tied to trellis at this time. Do not tie too tightly, so growth can begin and not be hampered by tying too tight or cracking these stems.

Pruning Type 3 :

This group blooms later and from new growth. This group should be pruned in February or March as new leaf buds begin to show low on the plant. All dead material above these buds should be removed at this time. Clean out any old foliage or foliage with mildew at this time also.
