Pruning Type : 2

Tranquillite

Pruning Type : 3

Pruning Type 2 :

In this group, all the first flowering comes from last season's ripened stems. In early Spring watch for swelling leaf buds beginning to show. Cut all dead material off above these swelling buds. Be sure all growth is tied to trellis at this time. Do not tie too tightly, so growth can begin and not be hampered by tying too tight or cracking these stems.

Pruning Type 3 :

This group blooms later and from new growth. This group should be pruned in February or March as new leaf buds begin to show low on the plant. All dead material above these buds should be removed at this time. Clean out any old foliage or foliage with mildew at this time also.
