

Online Code Breaker

A Team Building Game for Remote Employees

Instructions

We have an emergency and need our Robot IB98 to Crack a Code for us. But IB98 is nowhere to be found. Perhaps it is out for a lunch time oil job or is late returning from who knows where? Robots. They are impossible to work with!

We needed to take this problem to the smartest people around. So, we thought of your team!

We need you and your team to open 10 PDFs with passwords, which IB98 created before it disappeared!

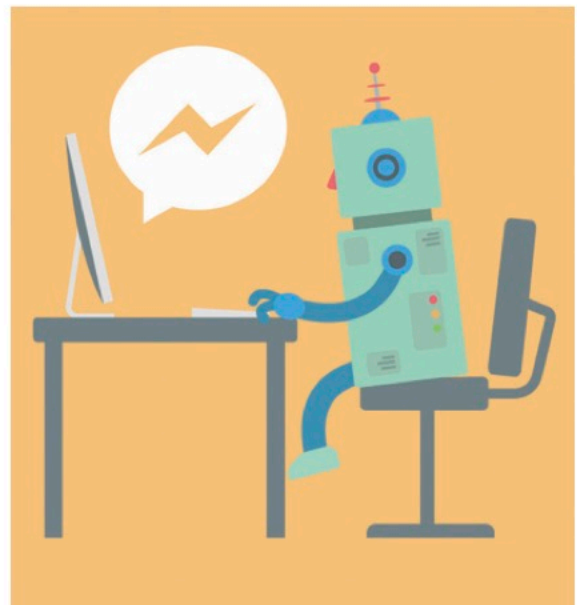

Luckily, Your Host has the Access Code to open the first PDF (PDF #1) from the folder you received. So, start with it and go from there.

Everyone on your team can open PDF #1 and follow IB98's instructions to Crack the Code to open PDF #2. Then continue to solve puzzles and perform tasks as a team to open all the remaining PDFs in sequence.

The first team to open the final PDF (PDF #10) will be our Master Code Breakers and save the day!

Let's hope you can locate IB98 through this code cracking adventure and bring it back to work... because Cracking Codes is hard!

Open PDF #1 from your folder using the Code The Host Provided, and let's get started!

To Crack the Code,
everyone should have
a **pen** and **paper**.

At least one team
member will need
a **printer** and **scissors**.
