Syrian Refugees-Amman Jordan-Petra-Dead Sea

Post Mission Travel to Israel

Israel- -Jerusalem-Bethlehem-Tel-Aviv-Sea of Galilee

June 16th (Sunday) – June 21stth Friday)

Much of the world's attention has focused on the disaster going on inside of Syria. But there is also a humanitarian crisis in neighboring countries that host Syrian refugees. In the last three years, Jordan has received more than one million refugees. The impoverished refugees live in camps with meager food, water and very little medical care. This medical/dental mission will be unlike any you have ever experienced. We will be working out of different clinic sites North of Amman. We will also work at other refugee sites throughout Jordan. This is Flying Doctors of America's fourth mission to these camps.

At the end of the medical/dental mission there is an option to travel on to Israel. This experience includes historical sites and visits to medical facilities and historical medical sites. If you choose not to extend the mission into Israel you can leave for the USA from Amman Jordan on Day 8.

June 14th Friday—Petra Jordan. After breakfast visit Petra. Deep within the deserts of Jordan lies the ancient city of Petra. Through a narrow gorge Petra emerges into view, revealing awe-inspiring monuments cut into the surrounding cliffs. Its people, the Nabataeans, harnessed precious water, enabling the population to soar to perhaps 20,000. Eventually the city fell silent, forgotten by the outside world. Today archaeologists are discovering clues to Petra's past. The spectacular objects displayed here, many unearthed by recent excavations, shed new light on this extraordinary desert city. We will spend a night at a nice hotel near Petra.

June 15th Saturday—Dead Sea. After breakfast we will go to the Dead Sea. We will arrive at the shores of the Dead Sea and relax and enjoy an unsinkable swim in the buoyant, mineral-rich, salty waters of the Dead Sea. The Dead Sea is a salt lake bordering Jordan to the east and Israel to the west. Its surface and shores are (1,388 ft) below sea level Earth's lowest elevation on land. With 33.7% salinity, it is also one of the world's saltiest bodies of water. You can float on water due to the high salt content. Then we will arrive back in Amman and have free time to explore Amman in the late afternoon. Dinner is on your own in the evening
