Tip:

It is important to rinse off before jumping in the pool!

Lake water, lotions/sunscreens, sweat, makeup, etc. can cause Yellow/Black Algae and clog the filter faster! Please advise your renters too!

Filter Cleanings:

Allowing your filter to become too dirty can put additional strain on the pool pump, possibly leading to mechanical issues and costly repairs.

A clean filter is needed to maintain the clarity of your pool and prevent the growth of algae and bacteria that can pose health risks to swimmers.

It is important to clean your filter every 6-8 Months depending on usage.

Tech Time Management

Our technicians have a maximum of 30 minutes to service your pool for each visit.

Remember, we are only there once a week; in between visits you should check your pool for dirt, leaves or debris on the bottom of the pool.

This may leave stains if left too long or not brushed overtime.

You may be subject to a fee if we exceed 30 min
