The Quarterly Wrap-up Newsletter | January 2026

New Year, New Glow: Transform Your Pool with Soda Blasting Magic!

Dustless Soda Blasting

Ditch the dingy scale from Arizona's hard water and start 2026 sparkling like new.

Enables us to de-coat and clean oil, calcium, algae and other grime from the tile in one step without leaving residue.

Pool Drains

We recommend a pool drain every two years due to frequent chemical additions and our dry evaporative desert climate can lead to accumulation of mineral contaminants on the pool tile and walls within the span of two years.

Filter Cleanings

A clean filter is needed to maintain the clarity of your pool and prevent the growth of algae and bacteria that can pose health risks to swimmers.

It is important to clean your filter every 6-8 Months depending on usage.

Please call our office to be added to the schedule

Heater Tune-up

Your heater needs attention after months of inactivity! Dust buildup can cause inefficiency or breakdowns right when you need warmth.

Schedule a professional tune-up to ensure reliable performance, lower energy bills, better air quality and fewer surprises.

Solar Covers

Help retain heat, reduce evaporation, and keep out debris. If you are interested in a solar cover please reach out to get a quote!

Reminder: covers must be removed on your service day
