Summer is coming in Hot!

With the hot sun approaching it is important to have your pool in its top condition, so you can enjoy all the fun!

Chemical dosages will increase as the temperature and pool usage rise.

Here are some quick tips for the Summer Months:

- Our technicians may start servicing earlier in the morning to beat the heat!
 - Schedules can run 1/hr per 10 degrees (Should not exceed 10hrs)
- If interested you can get a 50lb bucket of Tablets, please call for pricing!
 - Above-ground spa drains are recommended every 3-6 months
- Rinse off sweat, sunscreen, and lake water before jumping in the pool!
 - Adding borates to your pool will help with eye and skin irritation!
- Get your pool chiller looked at to make sure its working properly for the hot days ahead!

The Quarterly Wrap-up Newsletter - April 2026

Filter cleans and Soda Blasting Maintenance

A clean filter is crucial for the pool water's health in the summer months. The filter is the heart of the water's circulation system to ensure the water stays clear and healthy.

Filter cleanings are performed every 6-8 months depending on use. Please call our office to get scheduled!

The **Dustless Soda Blasting** method we use is non-abrasive and can be performed while the pool is still full as it has no effect on the pool water chemistry giving us the opportunity to complete in summer months. Please call for pricing!

Soft-water Pools:

Adding borates is a one-time boost, it is a stable additive, unlike chlorine it does not evaporate or degrade quickly, so you are set for the season with minimal keep-up.

Pair with regular filter cleans to keep circulation top-notch!

Helps Stabilize the PH
Algae worst enemy
Scale and Corrosion Control

Helps with Chlorine Demand
Smoother, Silkier Water
No Eye or Skin Irritation

less work, lower costs, and a better swim experience!

Want to see the difference yourself?

Contact us about adding borates to your pool this summer!

Thank you for choosing us to keep your pool looking great!
