

SUMMER

PRIORITY PEDIATRICS

MAY 2025

WELCOME TO OUR
Summer Newsletter

Dear Families,

We are so thrilled to welcome you to our first newsletter! At Priority Peds, we are dedicated to the health and well-being of our patients, and this newsletter is designed to keep you informed and engaged in their care!

In each issue, you can expect to find helpful tips and updates on health and wellness, as well as exciting updates about our practice. Thank you for trusting us with your child's health.

With love, Priority Pediatrics

PRACTICE UPDATES THIS NEWSLETTER

1. OUR NEW LOCATION
2. NEW MOLLUSCUM TREATMENT
3. SAVE MONEY BY ADDING SIBLINGS
4. INSURANCE COVERAGE FOR VACCINES
5. REFER A FRIEND AND SAVE MONEY

OUR NEW LOCATION

1216 SE 24TH ROAD

We are so happy to announce our new location, designed with your family's comfort and convenience in mind!

This spacious environment will allow us to continue providing exceptional care for your children while offering more amenities and access.

We invite you to come visit our new home!

SAVE MONEY BY ADDING SIBLINGS

WE ABSOLUTELY LOVE
WORKING WITH FAMILIES!

Life is busy enough without having to worry about multiple care providers! As busy parents, it makes sense to have all your kids seen at one office!

This summer, we are offering a sibling initiative. If you have a child enrolled in our membership program here at Priority Peds, we are now offering a discount to enroll their siblings!

For siblings of our existing families, we are offering to waive our patient enrollment fee (\$100 savings) PLUS take an additional \$25 off of their first month's membership price! We happy to offer this to siblings enrolling before August 1st 2025

Call our office to enroll (352)-664-2281 or visit www.prioritypedsocala.com

Refer a friend for \$25

Do you know a family who would be a great fit for our office? We'd love to have them here.

REFER A FRIEND AND
RECIEVE \$25 OFF YOUR
MEMBERSHIP

New Molluscum Treatment

MOLLUSCUM CONTAGIOSUM IS A COMMON CHILDHOOD VIRAL INFECTION WHICH PRIMARILY AFFECTS THE SKIN AND RESULTS IN THE DEVELOPMENT OF SMALL, RAISED PAINLESS BUMPS OR LESIONS

Candida Antigen refers to a specific type of protein that can be derived from the candida species, specifically Candida albicans and is commonly associated with immune response to fungal infections. By injected Candida albicans to the molluscum directly, the body rejects the virus and clears the skin lesions through immune response!

Unlike topical treatment of molluscum that can cause blistering, pain and scarring, this treatment is as simple as an intradermal injection with a very small needle for a virtually painless procedure. Call to schedule your evaluation and treatment or text your provider!

Insurance Coverage on Vaccines

- Due to our current economic climate, rising costs and poor coverage for insurance, Floridians and private practice owners are struggling to get adequate coverage for vaccines and preventative healthcare.
- As a result, we are unable to submit for insurance reimbursement for vaccines from the following insurance carriers: United Healthcare, Tri-Care, or Medicaid
- For patients with other carriers including: Aetna and Blue Cross Blue Shield, we are happy to curtesy submit for insurance, however, we will now be requiring 75% of the cost of vaccines as a cash deposit on the day of service. After reimbursement has been processed, we are happy to add that credit to your account accordingly.

Thank you for your partnership as we navigate this complex landscape and prioritize your child's health and well being!
