Manufacturer of Surgical Disposable Products

ISO 13485:2016, ISO 9001:2015 Certified

## About us!

*SETH PHARMA is a renowned surgical disposable manufacturer in India, established by Mr. Vijay Kumar Seth. Our primary objective is to deliver the highest quality surgical disposable products to healthcare professionals across the country. With certifications such as ISO13485:2016, ISO9001:2015, CE, and more, we ensure that our manufacturing processes and products adhere to the most stringent quality standards.*

*Under the esteemed brand name of ICP'S™ (INFECTIONS CONTROL PRODUCTS), we have built a strong reputation for excellence and reliability. We take immense pride in offering a comprehensive range of surgical disposable products, including masks, gowns, surgical drapes, shoe covers, and various other essential items required in medical procedures.*

*Quality is ingrained in our DNA. We have implemented a robust quality management system that spans every aspect of our operations. From the careful selection of raw materials to the precise manufacturing processes and rigorous quality control checks, we leave no stone unturned in ensuring the superior quality of our products.*

*Our dedicated team of experienced professionals work tirelessly to maintain the highest standards at every stage of production. By employing advanced technologies and adhering to international best practices, we consistently deliver top quality surgical disposable products that meet and exceed customer expectations.*

*In addition to our commitment to quality, we strive to establish enduring relationships with our clients. We understand that each healthcare institution has unique requirements, and we are devoted to providing personalized solutions tailored to their specific needs. With a customer-centric approach, we offer exceptional service and support, ensuring a seamless experience for our valued customers.*

*We are committed to continuous improvement and innovation. We invest in research and development to stay ahead of industry trends and advancements. By keeping ourselves at the fore front of technology and healthcare innovations, we aim to introduce cutting-edge surgical disposable products that enhance patient safety and improve healthcare outcomes.*

*Our journey has been marked by a relentless pursuit of excellence, integrity, and Customer satisfaction. As we move forward, we remain steadfast in our commitment to providing the best quality surgical disposable products under the trusted brand name of ICP'S™ (INFECTIONS CONTROL PRODUCTS). We aspire to be the preferred partner for healthcare professionals, setting new benchmarks in the industry while positively impacting the healthcare landscape in India.*

It is "a long loose piece of clothing worn in a hospital by someone doing or having an operation". It can be used as clothing for bedridden patients. Patient gowns worn by patients are designed so that hospital staff can easily access the part of the patient's body being treated. The patient gown is made of fabric that can withstand repeated laundering in hot water, usually cotton, and is fastened at the back with twill tape ties. Disposable patient gowns may be made of paper or thin plastic, with paper or plastic ties.

- STERILE : Sterile & Non-Sterile

Description : Isolation gowns are examples of personal protective equipment used in health care settings. They are used to protect the wearer from the spread of infection or illness if the wearer comes in contact with potentially infectious liquid and solid material. They may also be used to help prevent the isolation gown wearer from transferring microorganisms that could harm vulnerable patients, such as those with weakened immune systems.

Shoe Covers offer a protective covering for shoes worn in the healthcare facility. They help minimise contamination and prevent the transmission of microorganisms between staff and patients and hospital-acquired complications. Each is ideal for less critical areas in the healthcare facility. The main function of shoe covers is to provide protection for the patient, the medical operator and the shoes they are wearing from contaminants, by a physically covering the shoe.

- Disposal for single use.
- Keeps your workplace Dirt free.
- Protect floor against contamination from footwear.
- Available in Spun bonded fabric also.
