“NOT MAKE DIVERS”

PADI UNDERWATER SEARCH & RECOVERY SPECIALTY DIVER COURSE

The PADI Underwater Search & Recovery Specialty Course helps you to retrieve lost items that have fallen overboard or over a dock. Learn effective swimming patterns and using a lift bag for heavy objects...

The advertisement features a central image of a diver in a black wetsuit and mask, holding a large orange lift bag. To the left, there are three smaller inset images: the top one shows a group of divers on a beach, the middle one shows a diver underwater, and the bottom one shows two divers working together. The PADI logo is in the top left corner, and the text 'The Way the World Learns to Dive™' is to its right. The title 'SEARCH & RECOVERY' is prominently displayed in the lower right of the central image. Below this, a paragraph describes the course. At the bottom, there is a white box with contact information for ORACLESCUBA, including a telephone number, website, and email address. A small copyright notice is at the very bottom.

PADI SEARCH & RECOVERY DIVER SPECIALTY COURSE

Accidentally drop something in the water? Looking for lost treasure? Learn effective ways to locate objects underwater with PADI's Search & Recovery Diver program!

To take the program you'll need to be at least PADI Open Water Diver (or equivalent) with the dive credential of PADI Underwater Navigation (Junior ratings accepted) or PADI Advanced Open Water Diver (Junior Advanced Open Water Diver or equivalent). You also need to be at least 12.

During your program you'll go on four open water dives, which are conducted over at least a two-day period, with time being equally divided between academic and actual water-training sessions.

Your program will cover techniques and application of a variety of search and recovery methods and includes the following:

- PADI ADVANCED OPEN WATER DIVER OR EQUIVALENT
- 15 YEAR OLD
- FOUR OPEN WATER DIVER

UPON COMPLETION, YOU BE ABLE TO :

- Planning, organization, procedures, techniques, problems, and hazards of search and recovery diving.
 - Limited-visibility diving and underwater navigation techniques.
- Proper techniques and safety considerations for object location, including the use of various search patterns, lines and reels.
- Proper techniques and safety considerations for recovery of objects using various lifting devices.

The elective search and recovery dives conducted during the Adventures In Diving program may count toward this specialty at the discretion of the instructor.
