"WE BUILD DIVERS" "NOT MAKE DIVERS"

PADI NIGHT SPECIALTY DIVER COURSE

The PADI Night Diver Specialty course is designed to equip divers with the knowledge and skills necessary to safely and confidently explore the underwater world at night. Night diving offers a unique experience, with different marine life behaviour and an entirely different ambiance compared to diving during the day

During the Night Diver Specialty course, participants learn about the specific equipment and techniques required for night diving, including underwater lights, signaling devices, and navigation methods. They also study the challenges and safety considerations associated with diving in low-light conditions, such as limited visibility and potential disorientation.

The course typically includes both theoretical knowledge development and practical training in the water. In the classroom or through online materials, divers learn about night diving procedures, potential hazards, and emergency protocols. They also discuss how to maximize their enjoyment and safety while diving at night.

In the water, participants practice skills such as properly deploying and using underwater lights, maintaining buoyancy in darkness, communicating with hand signals or light signals, and navigating effectively. They also have the opportunity to observe nocturnal marine life and experience the unique atmosphere of the underwater world after dark.

Completion of the PADI Night Diver Specialty course allows divers to safely explore and enjoy night dives in a variety of environments, from coral reefs to wrecks. It's a popular specialty course among divers looking to expand their diving experiences and discover the beauty of the ocean after sunset.

NIGHT SPECIALTY DIVER COURSE

PADI

Total dives – 3 dives course

Prerequisite – Open Water Diver and
above

Details – Online class to complete Knowledge Review and Exam PLUS Short theory class by Zoom or F2F
