

# <https://world-war-3.us/>

**NOTE:** I don't write EVERYTHING that I want known in one piece. And that's what this is, just one piece. If you want to understand where I stand and the message I'm trying to get out there, you have to read everything I have put in PDFs. And I am STILL adding more pieces. My position is neutral. I don't adhere to a religious doctrine or a statement of faith. I have NO political leaning because politics only purpose is to divide the people.

Get familiar with what I put in PDF. You can download the PDFs and share them if you like what you read.

**The following is just an approximate timeline. I'm not trying to nail down a specific exact timeline. The timeline doesn't matter. What's going to happen is the important information here.**

## **The Warning No One Wants to Hear:**

Right now, in March 2026, the United States is locked in a war it cannot afford to lose. This is not a war of tanks rolling across Europe or armies invading beaches. It is a war for the single thing that decides everything else: who gets to issue the global reserve currency. On one side is the western nations, U.S.A., U.K. Canada, Western European countries etc. Asian countries, Japan, Taiwan, South Korea etc. IMF bloc — led by the United States, still backed by the dollar's petrodollar system and the most powerful military on Earth. On the other side is BRICS — Russia, China, Iran, India, Brazil etc. — fighting for a new commodity-backed system settled in yuan.

Every headline you see is part of this one fight. Iran selling oil in yuan. Russia anchoring prices outside the dollar. China threatening Taiwan. Venezuela, Libya, Iraq, all former players in BRICS, targeted by the United States to force them back into selling oil in U.S. dollars.

AI, data centers, CBDC (Central Bank Digital Currency), Stable Coin, Digital drivers lic and digital IDs — all of this leading into a new economic system that will rule the entire world. The United States holds every conventional advantage: the only real aircraft carrier fleet that can reach any ocean in the world in days and project it's military power over the skies of nearly any nation, the ability to shut down China's export economy overnight simply by stopping imports into the U.S., and the global reach that BRICS cannot match. China's entire economy still depends on American consumers. Russia and China has no means to project military power the same way. In every way the United States and the western IMF nations hold a resounding strategic advantage against BRICS.

But this is not a normal war. If the U.S. loses this war it will lose its ability to buy food, energy, and weapons on the world market. It loses the massive global income from selling oil in it's own currency. It loses massive incoming trade that nations depend on to earn U.S. dollars so they too can buy oil in Dollars. It loses sovereignty itself. This is a situation where the U.S. has to win, or die.

If BRICS loses, the fate is even worse for them. A complete collapse of their economic system. Massive poverty and starvation. 90% of their production capacity will cease to exist. Massive uprisings and revolts and an end to their governments respectively.

This is not speculation. This is the straight-line logic of where we are headed, written as a warning while there is still time to see it. And the introduction of this CBDC/Stable coin is the final nail in the coffin that is what's left of our republic, The United States of America.

## **Phase One: Building the Digital Cage — March 2026 to December 2030**

The dollar is nearly completely devalued and worthless. It's buying power is decreasing every year. The answer the central bankers have come up with is the CBDC, or, Stable Coin in the U.S. The United States is using these four years to force every citizen into a system that will remove their rights and leave everyone vulnerable to a system of absolute slavery..

CBDC/Stable Coin — is already moving from pilot to mandatory. By 2030, according to their own timeline, every paycheck, every government benefit, every mortgage, every purchase will require a digital drivers

license, AKA Digital ID. Digital wallets will be your digital currency method of payments. If you refuse the digital ID, you cannot buy gas, groceries, or cross state lines. You cannot have a bank account, pay your mortgage, visit the Dr. or get a simple cheese burger.

The massive data centers now being finished across the Midwest and coasts are not for Netflix or Amazon. They are the backbone that will run the blockchain ledger tracking your every move, freezing, or expiring every single digital dollar in real time. Every asset will be tokenized. Even the trees in the forest. Every single tree, will be tokenized and turned into an asset.

Most Americans will go along with it. Even those that are supposed to be the most "awake" during this time, those that claim to know, and follow, G-d. And the introduction is not going to be so night and day, it's being rolled out very subtly, and getting you into their system will be easier than you think.

Millions of people will refuse to comply. They will hoard physical cash, silver, gold, form barter networks, drop off the grid, and simply stop using the system. The government will not need to arrest them. It will starve them. Accounts frozen under "currency defense" rules. Foreclose on their homes. Reposes their vehicles. Seize any tangible assets that can be sold, jewelry, tools, art, collectibles. Wages diverted. Children's benefits cut. The people who refuse to comply — broke, hungry, and powerless — without a single bullet fired. The Constitution will still remain in place, feeding you a lie that you have rights. The new ledger simply makes it meaningless in daily life.

Mass immigration from Muslim Arab regions and other third world failed nation states with violent and ideologically driven criminal and terrorist elements will be kept wide open during these years. And yes, including by Trump. It's not kindness. It's dividing the house amongst itself. Americans fighting each other over schools, housing, jobs, safety and culture so they stay divided and distracted while the data centers finish construction and the kill-switches go live. Keeping Americans divided keeps people from uniting as one and resisting whats happening. Keeping a violent element hammering away at decent people keeps them afraid, dare I say cowering, and unable to move or do anything to fight back.

By the end of 2030 the cage is complete. The IMF bloc has the digital infrastructure ready. This is where the global world war takes on a new and sinister turn.

### **Phase Two: The Fracture and the End — January 2030 and beyond**

BRICS countries under the leadership of China and Russia fight back. Regional conflicts over every continent erupts and the U.S. is left in an over stretched position to respond effectively. The focus of these conflicts remain the middle east. U.S. intelligence assets foment revolt in neighboring countries to Russia and China and force their militaries to respond keeping them stretched and over burdened while acts of sabotage increase. Russian oil refineries deep inside Russia are sabotaged. Factories in Russia and China imperative to their war efforts sabotaged. Accusations and international crisis boil over with threats of nuclear retaliation. Counter sabotage takes out several major U.S. refineries. U.S. oil shipping struck and tankers sunk. Increasing acts of terrorism on U.S. soil take place with ever increasing fatalities.

BRICS have no hope of winning this war. BRICS nations face the choice every losing power faces when its currency dies: surrender or end the game. They choose to end the game.

Russia and China execute a coordinated nuclear ICBM decapitation strike. The targets are surgical and final: every major city in the United States, every strategic command node that controls the remaining U.S. forces. Every carrier group at sea. Underwater nuclear detonations in an attempt to clear U.S. boomer subs from retaliating. Key strategic points across Europe and Asia hit. Remaining U.S. boomer subs respond by launching everything they have at Russia and China and other key BRICS nations. As these subs give their positions away, they are taken out by Chinese and Russian anti submarine ships and aircraft. The United States never has a chance to launch its own ICBMs inland. Every launch silo in the nation remains still.

The United States is destroyed in under forty minutes. The strike is swift and incredibly fast.

East Coast cities and key interior hubs become fireballs. High-altitude electromagnetic pulses fry the surviving electrical grid. The United States goes dark forever in the same hour the warheads arrive. Famine and radiation sickness finish what the missiles missed. Nuclear reactors start to melt down with no one to respond to contain them. Within weeks the surviving population — perhaps 15 to 20 percent at most —

faces total destruction. There is no "reconstituted government." There is no hardened ledger handing out rations. The United States, as a functioning nation and as the anchor of the IMF bloc, ceases to exist.

With America gone, the war is over.

China and Russia do not need to invade. They do not need to occupy. The dollar is dead. The IMF system is dead. The only functioning reserve currency left on the planet is the BRICS Unit. European allies, stripped of American protection and facing their own collapse, fold into the new system within months. The scattered remnants of the old order — Canada, Australia, a few Pacific holdouts — accept the new order or starve. By mid-2033 the planet has one victor and one loser. Hundreds of millions of people, maybe billions of people, all over the world are dead in the course of 1 hour.

BRICS — led by an intact China and a battle-hardened Russia — rules the ashes with its commodity-backed, blockchain-enforced currency. The data centers that were supposed to save the West are radioactive craters. The digital IDs that were supposed to control every citizen are buried under fallout.

The nations left standing, China, Russia, and a grouping of nation states now turn their land armies to one nation, Israel. With the United States gone, Israel is nothing. Soon Israel will be surrounded by the largest multi national coalition army ever assembled in the history of earth.

This is the cold, brutal outcome. An outcome YOU, the reader are participating in. Russia and China will not accept second place. They will not accept defeat. They will end the game instead. And what has the people of the United States done? They gave up the very freedom and liberty that men fought and died for in a revolution in 1776. The founding fathers gave the American people every warning. And the American people were utterly defeated from an enemy from within. And the American people allowed it to happen because no one had the guts, the courage or moral decency to stand up and fight back.

If you are reading this in 2026, understand what is being built around you right now. The data centers rising in your state, the digital ID being pushed through your driver's license, the CBDC/Stable Coin digital wallet app they want you to download — these are not upgrades. It's slavery that you allowed.

The war is not coming. It is here. We are every bit in the middle of world war 3 right now. And it ends with America gone.

The only question left is how many of us will still be alive to watch the sky light up and terror rein down on the once great United States of America.

How close does this match biblical prophecy? And I don't mean, christian prophecy, I don't mean Jewish Prophecy, I don't mean Islamic Prophecy. I mean, how much matches up to G-ds prophecy?

Everyone needs to open their eyes. This is a time of deception. Consider that you too are deceived. Christians, Jews, Muslims, Atheists, all of mankind. You ALL got everything WRONG!

Some other thoughts; I don't know for sure if the constitution and form of government will stay intact through this roll out. It's very possible that the government is dissolved, the constitution dissolved and replaced with a tyrant that wields unlimited power and control.

We could very well end up under martial law and experience round ups of "enemies of the state" many of whom will never be heard from again.

The one certain thing I know for sure, is this WILL end with the total destruction of the United States of America.

And I want to finish with one more thing; Anyone that partakes in this new digital economic system, however it unfolds, will never receive forgiveness of sins from G-d. You are condemning your soul for all eternity. G-d has a line drawn in the sand and as harsh as that line is, it's there for a reason. Obey G-d. He has made it clear to leave, to refuse this digital system, and to leave Babylon the great.
