

Logger Company Setup Form

Loggers may be individuals or companies. A logger is the entity logging on a tract and is required to hold a valid logger certification number in the state they reside. For MS, these can be found at <https://logged.msstate.edu/find-a-logger>

A logger is not necessarily the Payee. The payee is a separate entity in the system. If the logger is also the payee, a payee form will need to be completed.

Mobile number will be utilized to send infrequent text notifications of mill status or important safety notices to all loggers setup in Triple J computer system. It is important one of the phone numbers listed be a person of capacity to make decisions on the tract in the woods for the logger.
