To Whom It May Concern:

It is a pleasure to write in support of Champion Cloud Services. Our company was very apprehensive about changing and upgrading our systems. We were worried about several crucial things such as installation timeline, price, and loss of production time. In our business, our ability to communicate is imperative.

We interviewed both large and small companies for a long overdue evaluation of our systems. Champion Cloud was the perfect choice. Chad and his team are very professional, thoughtful, and so easy to work with. From the installation to end results, we have been very pleased and appreciate their responsiveness.

Also, it is important to note that beyond the daily operational aspect, we have a rather complicated method of payment and they have been able to accommodate our needs better than much larger companies and entities that we pay regularly. Whether your business is large or small, I feel confident that they will meet and exceed your expectations.

We have received outstanding customer service and expect that our partnership with Champion Cloud will continue for a long time. We recommend them without hesitation. I welcome the opportunity to discuss any questions or concerns you might have.

Sincerely,

Vice President

D.T.
