STORY IS EVERYTHING

Story telling connects us all. As a producer, I have chosen a career that allows me to collaborate and contribute to story telling on a national and sometimes global level. My creativity is boundless & off-beat while rooted in the traditions of motion picture story telling. I am in love with the world, with media, and with seeing people smile or feel when they watch and experience a story I am part of creating. I believe my sincere charisma is motivational, my years of experience builds confidence, and my pure love of this art inspires those around me. I know what I am doing because I have lived, breathed, and performed in this industry for 18 years.
