

To our amazing Lathered family,

In light of the most recent updates on Covid 19, Lathered is taking as many measures as possible to do what we have always promised to do - Keep you, your loved ones and your home germ-free. Lathered is dedicated to doing our best to assist you in this time of need and doing our best to contribute to "flattening the curve".

While there doesn't seem to be any guarantees in life right now, we do have a couple:

- None of our Lathered staff that will be entering your house have been traveling or out of country within the last month.
- We did address travel early on to be sure we are not cleaning any homes of anyone that has been traveling within the last three weeks.
- Our staff must stay home from work if they or anyone in their home have any symptoms and have asked that clients reschedule for the same reasons.
- Along with extra hand washing and sanitizing techniques becoming the new normal.

We love our staff and have assured them all that their job security is there if they feel the need to take any time off during this time. They are also aware of financial assistance readily available to them.

We feel blessed to be able to help keep your homes clean and germ free. This is what Lathered was made for and where we expect to thrive. We are a family and we will always take care of our own and do whatever we can to keep one another healthy and happy.

Respectfully yours,

Your Ladies of Lathered
