A WARM WELCOME EVERY TIME YOU COME HOME

Made in the UK from the strongest materials, whichever design you choose will keep you snug, safe and stylish throughout the year. Each composite door is finished with real attention to detail, making them almost indistinguishable from traditional timber doors – but with a range of modern advantages.

Pick from our collection of door styles, handles, knockers and colours to give your home real character.

WHY CHOOSE A COMPOSITE DOOR?

Ultra-secure

Our range uses the most reliable and trusted hardware and technology. It means we can offer Secured by Design options on our composite doors which can meet or exceed the official police security initiative. The accreditation is only awarded to doors that offer exceptional security features and pass stringent testing. Thanks to a low maintenance PVC-U frame with steel reinforcement, and secure multipoint locking system, your new door will give you the highest level of security, while a high security lock cylinder is a formidable barrier against intruders.

Lead time

With unlimited colours, a range of accessories and hundreds of glass designs to choose from, all our doors are built to order to match your design. We have marked the designs that may take longer with a stocked to help you plan.

Hardwearing

A composite door is a modern, low-maintenance alternative to wood or PVC-U – it will never rot, swell, crack, warp or need repainting. Their tough glass reinforced plastic skin means your door will withstand knocks, scratches and UV. We are so confident in our range's performance that we offer a 10-year guarantee on all doors and glazing.

Safe and sound

Every composite door is fitted with an extremely secure multipoint locking system offering you the highest level of security.

From start to finish, composite doors are designed and manufactured in the UK, to meet or exceed the latest British Standard and 'Secured by Design', the official police security initiative. 'Secured by Design' is only awarded to products which offer exceptional security features.

Secured by Design

Official Police Security Initiative

The flagship scheme recognises products which incorporate effective crime prevention solutions at the design stage; the accreditation is only awarded to products which pass stringent testing. The range makes use of the most reliable, trusted technology and hardware in the industry.

Each door has been designed to provide a formidable barrier against even the most determined intruder, so you know that all your visitors will be by invitation only!

Secured by Design does not come as standard and needs to be specified at point of ordering.

High Security lock cylinder

Thanks to clever, patented technology, the High Security lock cylinder is impenetrable to snapping, offering you the highest level of door lock security, and the provision of a formidable barrier against any would-be burglars.

Unlike any other snap resistant door cylinders, which try to stop burglars snapping the cylinder to get at the inner workings of the lock with tools like claw hammers, the High Security cylinder keeps the central cam solidly in place once the cylinder is snapped, ensuring intruders won't have access to your home, or your possessions.

- Keeping you and your home safe
- Patented, Snap Secure technology
- · 'Secured by Design' accredited
- Pick, drill and bump resistant

British Kitemarked

Beautifully designed

All our composite doors are designed and manufactured in the UK to the highest standards. They come ready to fit with no visible screws, and fully sculptured frame to match popular window frame designs. You can choose from a range of colours, woodgrains and side panels to give you your desired look.

Our range isn't just designed to be beautiful: it's designed to be practical.

To make stepping into your home easier, we can fit your door with a low threshold.

- There is a huge range of colours and styles to choose from, within the composite range.
- The low threshold will minimise the step and provide easy disabled access.
- White, Rosewood, Golden oak or Anthracite Grey outer frames are available as standard.
- There is an exclusive range of decorative glass designs to choose from.
- No visible screws are seen.
- All our door slabs are 44mm single rebate.

Choose a colour or create your own

We use the RAL colour matching system to make sure you get the precise colour and shade you want for your door. Choose from hundreds of RAL colours, or bring in a sample for us to turn into a custom one. If you choose for your door to open outwards instead of inwards, we can colour the door's edge banding to blend in. This special feature has a longer lead time, but keeps your door looking sleek.

We are constantly improving our doors and accessories. If we find a better way to manufacture your door, the specifications of your finished door may be slightly different to the ones you see in this brochure.

Brighten your home with this traditional solid
