

Enterprise Architecture & Strategy Advisory for Public-Sector
SBA Certified WOSB & EDWOSB | SAM Active | Washington, DC

ArcMetis LLC - Capability Statement

ArcMetis is a Washington, DC-based, woman-owned Enterprise Architecture and Digital Modernization advisory firm helping public-sector leaders build secure, future-ready operating models. We deliver clarity, governance, and transformation strategies that elevate mission performance.

CORE CAPABILITIES

ArcMetis delivers architecture-led modernization, strategy alignment, and governance discipline for federal agencies.

Organizational Readiness Diagnostics

- Current-state capability assessment
- Gap analysis across people, process, technology, governance
- Readiness scoring & risk identification
- Multi-horizon transformation roadmaps

Enterprise Architecture Assessment

- Current-state architecture assessment
- Capability mapping
- Business, application, technology alignment
- Architecture gaps, risks, redundancies

Target-State Architecture Design

- Future state business architecture
- Target application & platform models
- Technology reference architectures
- Operating model recommendation

Strategic Roadmapping

- Modernization sequencing
- Transition states & dependencies
- Investment prioritization
- Strategy-to-execution alignment

Executive Architecture Advisory

- Technology investment & modernization guidance
- Portfolio rationalization
- Business-IT alignment
- Governance frameworks

AI & Zero Trust Strategy

- AI governance & readiness assessment
- Zero Trust architecture alignment
- Responsible AI frameworks
- Emerging technology strategy

Proprietary Diagnostic Frameworks™

ArcMetis has developed five proprietary readiness assessment frameworks that rapidly diagnose organizational capability gaps:

- **Federal Modernization Readiness Assessment™** - Evaluates initiative-level readiness across governance, vendor selection, funding, change management, architecture authority, and mission alignment
- **Enterprise Architecture Readiness Assessment™** - Evaluates EA function maturity across people, process, technology, and governance
- **Technology Organization Readiness Assessment™** - Evaluates CTO/CIO organization capability to execute strategic initiatives
- **Security Architecture Rationalization Assessment™** - Evaluates whether your security tooling portfolio is architecturally coherent, operationally integrated, and aligned to mission risk.
- **AI Readiness Assessment™** - Evaluates AI strategy, data infrastructure, talent, and governance readiness

*These diagnostics **establish current-state baselines** and **identify gaps** that we address through **customized transformation roadmaps**.*

CERTIFICATIONS

- **SBA Certified WOSB | SBA Certified EDWOSB**
- **SAM Active**
- **CMMC Level 1 Compliant | SPRS Registered**
- **UEI: PSS4WV422N29 | CAGE: 17CD5**
- **GSA MAS (Schedule 874) - Application in Progress**

CORE COMPETENCIES

Enterprise Architecture • Target State Design • Roadmapping • Zero Trust Alignment • AI Governance • Modernization Strategy

DIFFERENTIATORS

- **100% Woman-Owned** + Washington, DC Based
- **15+ years advising C-suite leaders** across federal agencies and Fortune 500 enterprises
- **Architecture-led, implementation-agnostic approach**
- **Deep experience** with NIST, FedRAMP, Zero Trust, EA governance, and AI strategy
- **Proven ability** to turn complexity into clarity, reducing technical debt and accelerating modernization outcomes
- **Proprietary Assessment Frameworks:** Five proprietary diagnostic tools that identify capability gaps in organizations before major transformation initiatives
- **Security Architecture Rationalization** is our vendor-neutral assessment of tooling sprawl, coherence, and mission-risk alignment

PAST PERFORMANCE *(ArcMetis is a new firm; below reflects founder's executive background)*

- **Led** multi-year enterprise modernization initiatives across large public-sector organizations, improving system reliability, operational efficiency, and governance discipline.
- **Designed** mission-critical **target-state architectures (security, cloud, data, and application layers)** supporting high-availability federal environments.
- **Developed multi-year modernization roadmaps**, including cloud migration, automation, and technical debt reduction for agencies with complex legacy portfolios.
- **Built enterprise architecture governance frameworks** and operating models adopted across federal and enterprise clients to drive accountability and decision transparency.
- **Developed** proprietary readiness assessment frameworks analyzing \$500M+ in modernization investments, creating predictive diagnostic tools for federal transformation initiatives.
