

PRO 360

ALKALINITY/WATER EXTRACTOR

America's Best Hydroponics & Garden Center™ presents the Pro 360 Alkalinity/Water Extractor

A new, simple rockwool prepping tool that makes the future of cultivating in rockwool much easier by removing excess alkalinity and stagnant water from all 6"x6" rockwool blocks. The **Pro 360 Alkalinity/Water Extractor** is a time saving tool that promotes faster rooting, increased oxygen levels to the root zone, increased nutrient uptake, stable PH levels and lower alkalinity levels. The **Pro 360 Alkalinity/Water Extractor** is designed to work with just the rockwool block or with the **Pro 360 Oxygen Pod** to remove unwanted stagnant water from over watered 6"x6" rockwool blocks from clone to harvest. A simple low-cost tool for checking PH, EC/PPM.

Proudly Made in America - Patent Pending

Why the **Pro 360 Alkalinity/Water Extractor** is needed:

- Lowers dangerously high alkalinity levels in rockwool
- PH balances the rockwool block for a more stable PH level
- Removes excess stagnant water from the wet/soaked rockwool block
- Promotes faster rooting and boosts plant productivity (roots in 5-7 days)
- Can be used in any stage to remove excess water from the rockwool block
- Adds maximum amounts of vital oxygen to the rockwool block from day one for root steering
- Less chance of root rot diseases, larva, insects, algae and mold growth
- Leaves rockwool block in an aerobic condition from day one
- Keeps rockwool block moist, not soaking wet, to steer the plant to produce more roots
- Makes nutrients more available for uptake to the plant
- Allows seedlings & clones to be water/feed in as soon as 6 days
- Eliminates squeezing and smashing the rockwool block and ruining its integrity
- No more waiting 2-3 weeks for rockwool blocks to dry out to start feeding
- A simple and easy to use tool for prepping all 6"x6" rockwool blocks
- Allows the roots and microbes to respire/breathe 24/7
- Easily attaches to any 3 ½ -5 gallon wet vac with a 2" hose
- Will optimize your growing experience in rockwool
- Allows you to start with even water content and oxygen levels
- Commercial/Professional grade hydroponic tool that is built to last
- Designed for all 6" rockwool blocks and will work with 1½" - 8" rockwool blocks
- Perfect with mini-blocks for unrooted clones at 40% less of their wet soaked weight
- Works best with the **Pro 360 Scale** for accurate and even water content (WC)
- Removes water out of rockwool blocks for easy removal at end of harvest for recycling
- The perfect tool for checking PH, EC and PPM of the rockwool or Coco/peat block in any stage

The **Pro 360 Alkalinity/Water Extractor** makes growing in rockwool easier with a new and more precise way to start seedlings or clones in rockwool blocks at 62% water content to start. The **Pro 360 Alkalinity/Water Extractor** creates a more productive plant through higher oxygen content bringing precision to the next level with a new time saving hydroponic rockwool prepping tool. The tool easily attaches to any 3 ½-5 gallon wet vac with 2" hose. The **Pro 360 Alkalinity/Water Extractor** makes it easy to remove the alkalinity and excess stagnant water from the rockwool block and add back vital oxygen without squeezing the rockwool and ruining its integrity. The **Pro 360 Alkalinity/Water Extractor** leaves the rockwool block with a stable PH and helps eliminate high alkalinity, PH fluctuations, lack of oxygen, nutrient lockout and root rot diseases.
