

PRO 360 HALO

America's Best Hydroponics & Garden Center™ presents the Pro 360 Halo

The **Pro 360 Halo** is the solution for automated irrigation in coco, soil and all potting mixes. The **Pro 360 Halo** simply fits around the base of any plant in any stage. The **Pro 360 Halo** allows for precise automation of water and nutrients to the plant for productive growth. Designed for 2 gallon – 5 gallon pots, **Pro 360 Halo** feeds plants evenly from 4 locations. It sends water and nutrient directly to the grow media, leaving room for oxygen to carry out respiration for faster nutrient uptake. The **Pro 360 Halo** allows the cultivator to grow plants more effectively with more vigorous growth for larger crop yields. The **Pro 360 Halo** system allows growers more time to do other tasks in the garden.

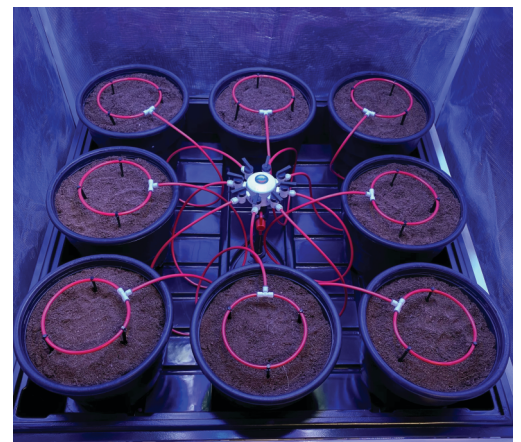

When the **Pro 360 Water Distributor** is attached to the time-tested **Pro 360 Halo**, a precise irrigation system emerges allowing all grow medias to receive much needed oxygen resulting in desired dry-backs of the media. There is a need for the grow media to dry-back. Dry-backs allow the roots to respire, making nutrients more available for uptake and to steer the plants to be more productive in every stage. This can result in larger yields with a higher quality end product. The **Pro 360 Water Distributor** and **Pro 360 Halo** are designed to eliminate wasted time and the inaccuracies of hand watering. These two revolutionary products used together will control water and nutrient flow with high flow valves for an accurate and precise control of water and nutrients to every plant.

Proudly Made in America

Why the Pro 360 Halo is needed:

- Waters and feeds plant nutrients evenly and accurately
- Can be used in any stage of plant growth
- Designed not to clog with salt or organic based nutrients
- Keeps the plant stem from being soaked
- Automation saves time, money, nutrient and labor
- Allows roots and microbes to respire 24/7 from day one
- A simple and efficient method for all grow medias
- Allows more control of dry-backs for plant steering
- Easily attaches to the **Pro 360 Water Distributor** with quick connect fittings
- Allows the plant to feed multiple times per day
- Eliminates the headaches from the inaccuracies of hand watering/feeding
