

PRO 360 OXYGEN POD

America's Best Hydroponics & Garden Center™ presents the Pro 360 Oxygen Pod

The **Pro 360 Oxygen Pod** is the first in the world, insulating and oxygenating housing that holds all 6"x 6" rockwool blocks with or without the factory plastic wrapping and eliminates algae. The **Pro 360 Oxygen Pod** keeps all 6"x 6" blocks elevated and level providing maximum amounts of aeration and oxygen to allow the rockwool or CoCo/Peat block to dry back quicker allowing you to water/feed small amount of nutrients multiple times (1-20) per day. When used with the **Pro 360 Cap**, nutrition is provided from the top down evenly, maximizing growth and boosting flower production resulting in larger crop yields with a higher quality end product.

Proudly Made in America - Patent Pending

Why the **Pro 360 Oxygen Pod** is needed:

- Protective insulating and oxygenating rockwool and CoCo/Peat block housing
- Improves the flow of oxygen and nutrients through the rockwool and CoCo/Peat block
- Eliminates algae 360 degrees around the rockwool and CoCo/Peat block
- Air prunes the roots 360 degrees and allows more root branching
- Allows rockwool and CoCo/Peat blocks to dry out quicker for more control of desired dry backs
- Keeps the 6"x 6" rockwool block from being squeezed or smashed
- Able to remove the factory plastic wrapping allowing vital oxygen to flow 360 degrees
- Designed at a 2½ -degree angle to allow all 6"x 6" rockwool and CoCo/Peat blocks to sit level
- Holds all 6"x 6" rockwool and CoCo/Peat blocks level for even drainage and even (EC) levels
- Holds the **Pro 360 Cap** level for even nutrient distribution and even water content (WC)
- Bug and larva deterrent reducing the need and the cost of pesticides
- Keeps all 6"x 6" rockwool and CoCo/Peat blocks elevated off the grow tray for root pruning and oxygen flow
- Allows the plant to feed multiple times per day to bring rockwool or CoCo/Peat block to full water capacity
- The thick-walled housing helps keep the rockwool or CoCo/Peat block cooler and more aerobic
- A valuable tool for plant steering with more control of dry-backs and water content (WC)
- Sits on top of the **Pro 360 Alkalinity/Water Extractor** to remove stagnate water in any stage
- Less chance of root rot diseases from over watering and not being able to dry out
- The thick-walled housing helps insulate against the heat and cold in greenhouses
- High quality and built to last for professional and commercial grows
- Works with or without the 6"x 6" rockwool block factory plastic wrapping
- The most effective and efficient way to get larger and heavier, high-quality yields
