

# PRO 360 WATER DISTRIBUTOR

## America's Best Hydroponics & Garden Center™ presents the Pro 360 Water Distributor

Growing with precision irrigation is simple with this easy to use, low pressure, high volume hydroponic watering distributor. The **Pro 360 Water Distributor** is a more precise way of dispersing nutrients evenly and accurately to the plants, saving money, time, water, nutrients and labor costs. Excellent for double or triple decking. Now it is possible to run multiple grow rooms with ease by using the **Pro 360 Water Distributor**. Designed to feed small amounts of nutrients evenly multiple times per day to keep nutrients more available for uptake and oxygen high for cellular energy. It also keeps Electrical Conductivity (EC) stable, which is a must in low Cation Exchange Capacity (CEC) rockwool, resulting in accelerated rooting, vegetation, and flower growth to help create a more vigorous and productive plant with larger crop yields.

### Proudly Made in America

Why the **Pro 360 Water Distributor** is needed:

- A more precise way to feed plants evenly and more accurately
- Eliminates the headaches from the inaccuracies of hand watering
- Can water/feed with as little as 25ml. or as much as 900ml. accurately
- Water line connects directly to the **Pro 360 Cap** (no clips needed)
- More plant sites with 8-valve, 11-valve and 14-valve systems that can be linked together
- Allows you to feed small amounts of nutrients to bring the rockwool or CoCo/Peat block up to full water capacity
- Saves money, time, water, nutrient and labor costs
- Excellent for double and triple decking systems
- Low pressure (4 lbs. max ) high volume designed to outflow anything on the market
- Only needs 1 single water line to each plant (best used with the custom pro-grade ¼" line)
- The first high-flow, low pressure distributor that works perfect with standard water pumps
- More control with precise, high-flow quality ¼" quick connect valves
- Never have to worry about over watering again
- Keeps the nutrient cations and anions available for uptake to the plant 24/7
- Will not clog with salt or organic based nutrients
- Allows micro-dosing of nutrients to keep EC levels stable and nutrients available for uptake
- The most controllable and reliable hydroponic water distributor made
- Perfect tool for plant steering to increase the quantity and quality of your plant
- Will boost the productivity of any plant from day one by making nutrients more available
- Eliminates using nonprofessional 1/16" connectors and all the problems they create
- Best used with the **Pro 360 Cap** and the **Pro 360 Oxygen Pod** for rockwool and CoCo/Peat blocks
- Easily attaches to the **Pro 360 Halo** for coco, soil, or any potting mix
