

## Automatic Drip

1. Clean the coffee maker components.
2. Apply the golden ratio (1g coffee to 18g water)
3. Grind the coffee (medium)
  - a. Slightly courser for flat-bottom filter
4. Use fresh coffee and cold, filtered water.
5. Dampen filter, add the grinds.
  - a. Allow enough room in the basket for the coffee bloom without hitting the shower head.
6. Level the bed, break up any clumps.
7. Start brewing coffee (4-8 minutes)
8. Set heating plate to low and do not leave for extended time (typically hotter than desirable)
9. Examine the brew bed after a batch for channeling:
  - a. Is it slanted, concave or even?
