

Association of American Medical Colleges (AAMC)

Established in 1876, the AAMC is a nonprofit association dedicated to improving the health of people everywhere through medical education, clinical care, biomedical research, and community collaborations. Its members are all 163 U.S. medical schools accredited by the Liaison Committee on Medical Education; 11 Canadian medical schools accredited by the Committee on Accreditation of Canadian Medical Schools; more than 400 academic health systems and teaching hospitals; and more than 70 academic societies. The AAMC also collaborates with the Department of Veterans Affairs (VA) and VA medical centers through their academic affiliations with AAMC-member institutions. Through these institutions and organizations, the AAMC leads and serves America's medical schools, academic health systems and teaching hospitals, and the millions of individuals across academic medicine, including more than 220,000 full-time faculty members, 100,000 medical students, 167,000 resident physicians, and 60,000 graduate students and postdoctoral researchers in the biomedical sciences. Through the Alliance of Academic Health Centers International, AAMC membership reaches more than 60 international academic health centers throughout five regional offices across the globe.
