

**“Don’t just mask odors,  
eliminate the source!”**

# ODORID® DRY

## Chlorine Dioxide Slow Release Technology!

ODORID® Dry is activated with moisture and provides a slow release of a powerful odor removing agent – chlorine dioxide. Depending upon the area of use, the canister should last for up to 6 weeks.

### Applications:

Institutional Applications include use in Food & Beverage Processing Facilities in the areas of

- Air Handling Systems
- Rendering Areas
- Disposal / Waste Management
- Offices and Laboratories (with high odors such as a waste water facility)

Hospitality and Recreational Facilities in the areas of

- Bathrooms
- Locker Rooms
- Refrigerators

Agricultural Facilities in the areas of

- Air Handling Systems
- Animal Confinement
- Grow-Out Houses
- Egg Laying Facilities
- Egg Rooms
- Milking Parlors
- Disposal / Waste Management
- Pump Rooms

Great for Automobiles

**Simply open the canister and place  
it in an affected area!**

### Features:

Each canister of Odorid® Dry contains patented powder material that is activated as the canister is opened. Diffusion with ambient air provides sufficient humidity to start the sustained generation of chlorine dioxide in very small quantities.

Chlorine dioxide is a powerful odor removing agent that reacts with and neutralizes odors at the source. Odorid® Dry is effective on most types of odors and is particularly effective on sulfidic odors such as those that emanate from decomposed waste.

Odorid® Dry is particularly effective in shoe cabinets, bathrooms and refrigerators.

*Microfiber membrane provides sustain release.*

*Caution: Care must be taken not to damage the container and spill contents on fabric materials or carpets to prevent bleaching. Any direct contact with the powder material should be avoided.*
