

El Paso
Innovation Hub

A project of the El Paso Community Foundation

Avanza: Data & Policy Hub

Uniting data and community in the Borderplex to shape our future

What is Avanza?

Avanza: Data & Policy Hub is a project from the El Paso Innovation Hub created from the belief that data can make a positive difference for the Borderplex. Avanza brings together **data, community voices, and public policy research** to illuminate issues that matter the most for the future of the Borderplex.

What Does Avanza Do?

Our mission is to **enable opportunities for the Borderplex** region through accessible data, inclusive stakeholder engagement and public policy research. We accomplish this through:

- **Disseminating data-driven policy** research
- **Building partnerships** and fostering community collaboration
- **Convening and engaging** diverse stakeholders to shape lasting strategies for a positive impact in the Borderplex

What's Next?

Data-driven research

Avanza is analyzing the data and conducting policy research. Focus pillars will be developed in the near future.

Outreach & Engagement

Avanza is meeting with community members to introduce the project and gain an “on-the-ground” perspective.

Communication

Avanza will be publishing their insights and findings via digital newsletter and social media.
