***The Singing Peers of St. Peter's School***

Saint Peter's School, Peekskill, New York, was founded in 1938 by the Reverend Frank C. Leeming who was at that time Rector of Saint Peter's Church in Peekskill. Beginning with twenty-four boys and six masters, the School has grown to the point where its present enrollment is 120 boys and 14 instructors. The boys this year come from twelve different states.

The Glee Club has been in existence since the founding of the School and for the past ten years has gone on tour every Spring. The boys of the School have sung in ten states during the past two years, and have always given an annual concert in Washington, D. C., and New York City.

The Glee Club is known by the title THE SINGING PEERS. A select group of twelve boys in the Glee Club—THE BISHOP'S MEN—appears in novelty numbers. The program consists of Negro spirituals, sea chanteys, college glees, songs from great shows, and religious music. The accompanist of the group is Mr. Grant McK. Smith.

***Adoption Service of Westchester, Inc.***

Take a child who needs a home, take parents who want a child, bring them together and multiply by 205. This is the achievement of the Adoption Service of Westchester, Inc. in three and a half years—an achievement that far outstrips original survey estimates of adoption needs made before the voluntary, non-sectarian, inter-racial service was founded.

But the Service's work is not simply a matter of multiplication. Potential parents must be measured by yardsticks of health, maturity, economic stability and ability to be good parents to children not born to them. Children must be placed with parents of the same religion as that of the original mother and an infant, under one, with a mother and father not over 37 and 41 years of age.

Before a home is found for them, children live with carefully selected boarding families to whom the agency pays a nominal fee.

***Adoption Service of Westchester***

Once a month they visit the Staff Pediatrician and Psychologist. The Adoption Service pays special attention to "hard to place" children, has arranged for the adoption of a few foreign children in cooperation with International Social Service.

The future plans of the child's natural mother is the concern of the agency, too. Guaranteeing absolute anonymity, it advises the mother-to-be on her problems, strives to help her achieve peace of mind and assists her, through counseling by the Social Service Staff, to plan a home of her own for her baby if this is her wish. Only when she is completely convinced that adoption is the best plan does the Service swing into further action.

The Adoption Service is in the building business — building the strength and security of a family around children who would otherwise face a future without this firm foundation.
