8. How OEM Works for Effervescent Powder

1. Select Core Function – Immunity, energy, beauty, detox, or hydration.
2. Choose Key Ingredients – Vitamins, minerals, collagen, herbs, or probiotics.
3. Pick Flavour Profile – Fruity, citrus, or herbal blends.
4. Decide Packaging Format – Stick sachets, tubes, or jars.
5. Sample & Testing – Taste, solubility, and shelf-life validation.
6. Mass Production – Delivered in GMP, ISO, and Halal-certified facilities.
