

REACH SVHC & SCIP Reporting Guide

Confident Compliance with Europe's Toughest Regulations

The **REACH Regulation (Registration, Evaluation, Authorisation, and Restriction of Chemicals)** is the EU's most significant chemical regulation, requiring businesses to **declare Substances of Very High Concern (SVHCs)** present in products above 0.1% weight by weight. Additionally, the **SCIP Database (Substances of Concern in Products)** extends this obligation, requiring companies to notify the European Chemicals Agency (ECHA) about SVHC-containing articles placed on the EU market.

Failure to comply can result in **blocked market access, financial penalties, and reputational damage**.

This guide provides a clear roadmap to compliance — and shows how **TrueNorth Global Compliance** helps you turn this challenge into an advantage.

What Needs to Be Reported

- **SVHC Thresholds:** If an article contains >0.1% SVHC by weight, it must be declared.
 - **SCIP Notifications:** Each affected article must be registered in ECHA's SCIP database.
 - **Updates:** Whenever ECHA updates the SVHC Candidate List (twice a year), companies must review and resubmit relevant declarations.
-

Key Steps in REACH SVHC & SCIP Compliance

1. Data Collection

- Gather material data from suppliers across your supply chain.
- Validate supplier declarations against the latest SVHC list.

2. Threshold Assessment

- Identify articles containing SVHCs above 0.1%.
- Conduct “article-as-such” assessments per EU guidelines.

3. **SCIP Notification Preparation**

- Compile mandatory data: article identifiers, concentration ranges, and safe-use information.

4. **Database Submission**

- Submit notifications to the SCIP portal and track confirmation.

5. **Ongoing Monitoring**

- Track regulatory updates (SVHC additions occur every June & December).
- Update records and resubmit as needed.

Why Outsource REACH & SCIP Compliance to TrueNorth

Managing REACH and SCIP reporting in-house is **resource-heavy** and **fraught with risks**. TrueNorth provides **peace of mind and efficiency** with these advantages:

1. **Expert Alignment with ECHA Requirements**

- Our specialists stay current with the evolving SVHC Candidate List and SCIP database requirements.

2. **End-to-End Management**

- From supplier engagement to SCIP portal submissions, TrueNorth manages the entire reporting cycle.

3. **Error-Free, Timely Reporting**

- Avoid penalties, delays, or rejected submissions with our proven quality checks.

4. **Supplier Engagement Support**

- We coach and validate supplier data to strengthen your compliance readiness at the source.

5. **Integrated Compliance Advantage**

- TrueNorth links SVHC & SCIP reporting with **IMDS, RoHS, and Conflict Minerals compliance**, ensuring your data works across multiple regulations.

6. Scalable & Cost-Effective

- Instead of hiring in-house experts, gain a flexible outsourced partner that grows with your needs.

Turn Compliance Into Market Confidence

With REACH SVHC & SCIP reporting, the difference between **risk exposure** and **market success** comes down to how well you manage your compliance obligations.

 Partnering with **TrueNorth Global Compliance** means:

- No missed deadlines.
- No rejected submissions.
- No regulatory surprises.

Just **seamless, ongoing compliance** — so you can focus on growing your business.
