

A place where
exceptional people
discover possibilities that
forever change their
lives and the world.

Gaining Admission

The Admissions Committees receive applications from throughout the world and value such diversity. They consider applicants as individuals and will carefully review applications in their entirety, giving particular attention to one's spirit of inquiry, commitment, and motivation toward nursing scholarship. Committees examine complete academic records, essays, and letters of recommendation regarding character, intellectual curiosity, seriousness of purpose, and outside activities.

“My education at the Johns Hopkins University School of Nursing is preparing me to provide patient education that is sensitive to individuals and their cultural context. I am proud to be confronting the serious threat of infectious diseases around the world.”

Sheyanga Beecher, BS '08
France-Merrick Scholar

– Adult, Family, or Pediatric Primary Care
– Adult Acute/Critical Care
– Accelerated Acute/Critical Care
- Nurse Educator Certificate Option*
– Post-Master's
- Forensic Nursing Certificate*
– Post-Baccalaureate
- Applied Health Informatics Certificate* – Post-Baccalaureate

Doctor of Philosophy in Nursing (PhD)

Doctor of Nursing Practice (DNP)

*Online options available

Financial Aid Opportunities

The Office of Student Financial Services will assist in obtaining financing for nursing studies. The School of Nursing participates in several financial aid programs that help defray students' education expenses, including grants, scholarships, loans, and work study. Funding for aid programs is provided through a combination of School of Nursing, federal, state, and private sources.

Johns Hopkins University
School of Nursing

The Johns Hopkins University School of Nursing, one of the nation’s top nursing schools, attracts exceptional students who are committed to becoming the best nurses.

Hopkins faculty, students, and practicing nurses transform their knowledge to serve society. The School draws nursing students locally, nationally, and globally, and graduates go on to extend nursing care to the Baltimore community, the country, and the world.

The Johns Hopkins University School of Nursing reaches for excellence — as do you.

U.S.News & World Report in 2008 recognized the Johns Hopkins University School of Nursing as the nation’s

- 2nd in graduate community health nursing programs
- 4th in overall graduate programs
- 7th in Nursing Service Administration

“At Hopkins, there’s an intellectual environment that promotes the exploration of awesome ideas and makes you critically evaluate the world around you. It has developed my critical thinking skills, my ability to debate issues, to question ideas and thoughts.”

Tam Nguyen, MSN/MPH '06, RN
Hopkins PhD in Nursing candidate

People

The Johns Hopkins University School of Nursing strives to create an inclusive environment where we become aware of one another’s background, interests, and assets while actively seeking to understand varied perspectives.

The diverse student body comes from throughout the U.S. and around the globe. Many have had successful careers in business, the military, industry, the Peace Corps, and other medical fields.

As one nursing student said, “Because we come from all over the world, everyone brings more to the discussion.” Such diversity is crucial in delivering quality nursing, because healthcare today demands ever-greater collaboration.

Among the numerous School of Nursing student organizations are Black Student Nurses Association, Men in Nursing, Nursing Students in Global Health, and National Student Nurses’ Association.

- The Numbers Speak**

 - 700 students
 - 74 full-time and 117 part-time faculty members
 - 40% of ranked faculty members with fellowships in the American Academy of Nursing
- 40 community-based outreach programs where students and faculty spend 12,000+ hours each year serving underrepresented populations
 - 5th in NIH funding among schools of nursing

As a Peace Corps Volunteer, Katherine Hartman has taught Costa Rican women how to run a business, worked on statewide dental care and vaccine policies, and helped slow the sale of flavored cigars to Baltimore City youth. And she isn’t stopping there.

Katherine Hartman, Accelerated BS '10
Peace Corps Fellow, Gurtler Foundation Scholar

- Only at Hopkins**
- Adjacent to top-ranked schools of nursing, medicine, and public health — just steps from *U.S.News & World Report’s* No. 1 hospital
 - Collaborations with 17 nursing and medical schools in 12 countries
 - Office of Global Nursing and Center for Global Health
 - Highest pass rate among Maryland nursing students taking the NCLEX for the first time
 - Articulation agreements with 14 U.S. colleges and universities

Places

This is the place to be! The Johns Hopkins University and The Johns Hopkins Hospital not only are *in* the heart of Baltimore, but *are* the heart of Baltimore.

Our students live in hip and historic downtown neighborhoods: Fells Point, Little Italy, Patterson Park, Mount Vernon, Butchers Hill, Canton, Harbor East, Charles Village, Hampden, Remington, and Waverly.

With Hopkins at its center, Baltimore is a national hub for healthcare training and provision. The city hosts several other nationally ranked hospitals and two rapidly developing biotechnology centers. Major federal agencies, such as the Centers for Medicare and Medicaid Services, are based here.

Many students are Returned Peace Corps Volunteers making the transition into nursing through our unique community health opportunities. Our baccalaureate Peace Corps Fellows program was the first of its kind in a U.S. school of nursing. And our new partnership with Teach for America gives corps members and alumni opportunities to work with urban populations in underserved regions.

Possibilities

Students study and volunteer in urban clinics near the East Baltimore campus and launch exciting careers in settings providing global perspectives on nursing leadership. They conduct research at the nearby National Institutes of Health and intern in Congress and at federal agencies such as the FBI. Many enhance their skills in Africa, Asia, and South America.

On campus, “you are in a clinical environment with other student clinicians. It’s a situation of constant learning,” says one faculty member. “The hospital is like a big practice laboratory: nursing, medical students, and residents.”

Research opportunities abound for our baccalaureate and graduate students: basic science, clinical practice, domestic violence prevention, healthcare management, and more. Students benefit from intense, mentored experiences with faculty members in an unparalleled, multidisciplinary research environment.

- Expanding Opportunities**

 - Simulation laboratories at the School and The Johns Hopkins Hospital provide realistic, interdisciplinary clinical practice
- Unparalleled multidisciplinary environment for intense mentored research experiences with renowned faculty
 - Collaborative programs with the Johns Hopkins University Carey Business School and Bloomberg School of Public Health
- Closely mentored preceptorships—caring for several patients simultaneously—through the unique Clinical Academic Practice Partnership

When Brett Morgan decided to go back to school for a doctorate in nursing practice, he knew there was nowhere he’d rather study than at the Johns Hopkins University School of Nursing. “I knew Hopkins would be bringing the best of the best to the program.”

Brett Morgan, DNP '09, MS, BS '02, CRNA
