The new facility increases the number of opportunities for secondary and post-secondary students by increasing the square footage within each academy. For example, the increased space at the NWDC versus the current NCC in the Manufacturing Academy increases from approximately 5,000 square feet to over 15,500 square feet. The construction academy increases from 8,600 square feet to over 13,200 square feet. This will add more sections for programs such as Welding or other related manufacturing that has a huge workforce demand and also student demand with current waiting lists.

There are currently 12 programs at NCC with a total of 28 sections where students can get career training. Two programs currently have two teachers. When the building programming is complete, there will be a total of 23 programs, with a possible total of 54 sections of career training. Please note that all new programs will not start at once and will be phased in based on demand and market support from various industries. For more information on future Northland Career Center programs, contact Jeff Green at greenj@platteco.k12.mo.us or (816) 365-9809.
