SOLA FLOWER

Handmade flower & decorative
items from and 100% natural
material

M . G A R D E N

2024 - 2025

M GARDEN

We are manufacturing and Exporting Artificial Flower, decorative items and customize handmade accessories. Special flower arrangement for wedding and event decoration. All products are made from natural material (SOLA FLOWER).

Sola wood flowers (or shola) are an eco-friendly and sustainable alternative to cut flowers. Made from the renewable wood of a marshy plant (not tapioca or cassava as commonly misunderstood), by our craftsmanship's hand, M GARDEN's sola wood flowers look like real flowers and last a lifetime.

M . G A R D E N

WHAT ARE SOLA WOOD FLOWERS MADE FROM?

Every single sola flower is created by hand and no machines are used. Every flower is composed of petals that are hand-cut from the delicate sola wooden sheets, and then composed to create gorgeous, realistic flowers. It's an artisanal process that can't be mechanized

The plant has a layer of bark that covers the internal, cork-like center of the plant (called the 'cream'). In most flowers, the bark is stripped and the center is made into thin sheets. It is these sheets that are hand-cut to make sola wood flowers.

WHAT ARE SOLA WOOD FLOWERS MADE FROM?

Sola (or 'shola') wood flowers are made from a plant called *Aeschynomene aspera*. It's a plant that grows wild in marsh areas. Because it grows quickly, it is a renewable resource and one of the lightest known woods. If you've ever touched balsa wood before, it's a very similar feeling.

M . G A R D E N

OUR STORY

Our SOLA FLOWER is individually hand-crafted in small batches by skilled artisans. Using sola wood from Thailand, which can be shaped differently than the sola wood from India, this collection delivers an elevated level of craftsmanship over and above our already top-quality regular line.

M . G A R D E N

Even though all sola wood flowers are made by hand, there are differences in terms of quality. When shopping for high-quality wood flowers, you want to ensure that the flowers are made from whole sheets and that the final flowers do not have any flaws. Flowers with visible flaws are less expensive, but result in a less-desirable finished product.

Sola wood flowers are available in over 50 flower styles, so pretty much any bouquet idea you could create with cut flowers can be replicated with sola! You'll want to read our post on selecting the ideal number of flowers for your bridal bouquet, and then from there, we recommend collecting inspiration photos and noting the mix of sizes and textures. Sola wood flowers can easily be dyed any shade.

DECORATIVE AND LONG LASTING

Two Ways to Scent or Fragrance Sola Wood Flowers

M . G A R D E N

USAGE 1

Use Eye Dropper

First, we get our sola flowers and our choice of scent or fragrance oil. Using an eye dropper, drip one or two drops of fragrance oil to a bloom. If you are scenting a whole arrangement or bouquet, feel free to drop a few more. Make sure not to overdo it. Faint floral whiff is much more soothing than an overpowering scent.

USAGE 2

Use Spray Bottle

Just as you would use perfume, spray the flowers with fragrance oil. If you are using concentrated oil, we need to dilute it with water. Add your chosen scent to a small spray bottle. Add a little water, shake, and then spray on your wood flowers. Feel free to recharge by spraying it some more whenever the smell fades.

Sola wood flowers are an excellent material to scent because the raw material, that is shola, is a type of wood that allows fragrances to easily infuse through them.

Frequently Asked Questions

1. Does fragrance oil discolor the flowers?

Our brand of fragrance oil does not stain the sola wood flowers. If you are worried that the scents you bought may have a different effect, drop the oil in between the petals or at the bottom.

2. How long will the fragrance oil last?

The average shelf life of fragrance oil is about one year especially if you frequently open it. For best results, we suggest purchasing only enough fragrance that you will use within 6 months to a year.

3. How long does the fragrance oil stay on the flowers?

Purchase our fragrance oils and apply them directly to sola flowers for scents that last from 3-6 months.
