CERAMIC DIFFUSER COINS

USED AS AN AROMA DIFFUSER

Just Add a drop of essential oil on it!
The surrounding air will become
purified and revitalized, instantly
turning your space into a sanctuary
of ultimate relaxation.

CRAFTED WITH NATURAL MATERIAL

It's a Diffuser ceramic that keeps you
comfortable and this ceramic is
suitable for any space requiring odor
control. It's made of natural porous
ceramics and fired specially to
achieve best purifying powers.

ELIMINATE BAD ODOR

Ceramic acts like an air-purifying
plant, absorbing and eliminating odor
molecules and moisture from the
surrounding air.

AROMA STONE DIFFUSER

*The main material for manufacturing the stone
ware mostly is clay and mud from the local area
around the kiln area which is sediment from river*

Raw materials used to make a stoneware body are mined from local quarries. The clay contains feldspar, a mineral found in crushed rich, which makes clay malleable and enables it to hold a shape when formed into a vessel. The clay is thoroughly dried before being pounded into small pieces by a machine. Next it is put through a sieve to remove impurities. If the clay is coarse, the process is repeated. Water is added and the clay is soaked until enough liquid has been absorbed to give it a dough-like consistency. Then it is put into a pug mill, mechanical mixer that kneads the clay to remove lumps and air pockets. If air bubbles are left in the clay, the vessel may burst during firing. Next the clay is put into plastic bags and set aside to mature. The epitome of modernity is revealed in this final stage of preparing the clay with the use of plastic.

OUR CRAFTSMAN

35 years of experience comes from our generational craftspeople, which compliments the skill and innovation inspired by our younger team members.

The aroma stone itself does not have any fragrance. It serves as a medium for scent diffusion and is used as a scented tool to release fragrances. It is made from natural minerals or synthetic materials and usually has a porous surface that can absorb and retain liquid fragrances.

Gradually, it releases the aroma, filling the surrounding environment with pleasant scents. Using an aroma stone is straightforward; you just need to drop fragrance essence/essential oil/perfume onto its surface, and the stone will absorb and retain the scent in its tiny pores. Over time, the stone will slowly release the fragrance, which can last for several days or even weeks, depending on the stone's size and the concentration of the fragrance.

Once the aroma from the stone diminishes, you can replenish it by adding more fragrance. Aroma stones provide us with visual and olfactory enjoyment, adding a sense of ritual to our lives. They are perfect for gifting or personal use.

“

*Eco-friendly,
no flame,
safe, and
easy to bring*

M GARDEN aroma stone is a handcrafted stone diffuser made from Thailand.

It emits a delicate aroma from the matte surface with just a few drops of essential oil.

For a refined and sustainable aromatherapy experience.

Aroma Stone Set Essential Oil Diffuser

Beautiful Rose Aroma Stone:

A simple and gorgeous rose shaped aroma stone. The plaster gently volatilizes the aroma, and does not use electricity or flame, making it economical and environmentally friendly and safe for families with small children. Can be used for either hanging or standing. Fill with essential oils (sold separately) or perfume of your choice to enjoy the fragrance that spreads. Depending on the oil type and environment, you can enjoy the scent for half to several days. When the scent is gone, add your favorite oil

Value Set of 3: You can use it anywhere in your living room, bedroom, bathroom, closet, entryway, etc. Whether you're relaxing yourself or entertaining your guests
