Genesis of the Soul — Chapter One
The Seven Stages of Creation Within
May 31, 2026

This special service brings together all seven days of Genesis Chapter One as a unified map of spiritual awakening. Rather than reading Genesis merely as an account of material origins, this lesson explores the creation story as the unfolding of consciousness within the soul.

How We Read Scripture at Rock of Truth Church

The letter reads what is written. The Spirit reveals what it means. The Truth becomes what is awakened within consciousness. Genesis is approached symbolically, spiritually, and practically.

Day One — Let There Be Light

Awareness awakens. Light represents understanding, discernment, and the first recognition that truth and error are not the same.

Day Two — The Firmament

Faith establishes stability. The waters of thought and emotion begin to organize into higher and lower patterns of consciousness.

Day Three — Dry Land and Seed

Stable thought emerges. Ideas become seeds and every seed reproduces after its kind.

Day Four — The Two Great Lights

Understanding and will begin governing life. Wisdom directs action and consciousness gains order.

Day Four Continued — The Stars Also

Discernment expands. Hidden patterns become visible and spiritual perception increases.

Day Five — Living Creatures and Birds

Thoughts become active and multiply. Higher ideas rise upward into awareness.

Day Six — Man in the Image of God

The divine pattern awakens within humanity. Wisdom, love, stewardship, and dominion emerge.

Day Six Continued — Dominion and the Inner Garden

The inner world must be governed. Habits, emotions, impulses, and desires are brought under conscious direction.

Day Seven — Entering the Stillness

The Sabbath symbolizes trust, completion, inner peace, and resting in Divine Order.
