DOLORES BARRETT GLASS ARTISTRY

Color Stix necklace

Hand-finished columns of laminated borosilicate and art glass. Rigid gold filled wire weave with Swarovski crystal accents. \$1,200

"I wanted to create a calliope of colors, reminiscent of an icy waterfall. The laminated technique enabled me to achieve the optically clear effect"

Color Stix Earrings

Three columns of laminated borosilicate. Gold filled wire findings.

\$200

Sun Moon Pendant

Copious layers of colored glass powders fused into a fully reversible pendant. 24k gold edging, vermeil rotating bail, and a 7 strand 18" vermeil chain.

\$1,500

"Celestial motifs have always fascinated me. I spent many an hour observing the night sky with my five inch refracting telescope as a child and teen. I wanted to incorporate that influence into a piece that represents the duality of the solar system."

FireRing Necklace

Cast glass “flames”. Fully padded and beaded neckwire with hidden magnetic clasp. \$2,200

“I love the contradiction of this piece; icy hot flames reaching out in graceful curves. It’s fire upside down”

Diapason Necklace

Fused strips of colorful art and dichroic glass. Gold filled static neckwire with borosilicate and vermeil beads.

\$1,800

“diapason is a musical term defined as ‘a burst of harmony’. As a musician and teacher, the five lines of the music staff were always present in my world. This piece combines two of the great loves of my life”

Aspects of Adele

Fused glass
panels. Hand
painted portrait.
24K gold accents.
Gold filled wire. \$2,300

"I have been an avid fan of the artist Gustav Klimt, especially his gold paintings. In 1907 he painted Adele Bloch-Bauer and ensconced her in layers of gold. I wanted to capture the sense of immortality captured in the painting. Adele is looking over the four elements of air, water, earth, and fire and the unusually shaped panels imitate the shape of her bouffant hairdo in the Painting"

Where the River Flows

Multi-layered fused glass components with 24K gold overlay. Gold filled wire and chain connectors. White diamond accent.

\$2,200

"The river starts at the sparkling embedded diamond at the tip and grows in intensity as it winds from panel to panel. I wanted to capture the dancing of the waters as they churned toward the focal bead"

Fused glass, hand painted anatomical eyes. Stainless steel wire, sterling silver chain.

\$2,000

All Eyes Are Upon You

"I based this piece on an optical illusion I witnessed as a child on one of our many family vacations. The eyes painted on the side of a funhouse appeared to follow the viewer as they passed by. I recreated the look in a glass format. Just pure whimsy and a way to incorporate my china painting skills into the glass medium"

Au~ Necklace

ensconced in 24K gold. Gold
filled tube beads and wire.
