Others to do the Same.

Medical and Rescue Standbys

Meeting and complying with OSHA 1910.146 for permitted confined space entries can be costly and time consuming. With the training required and equipment needed, it is not always financially prudent to handle this in-house.

The REDS Team has been doing confined space rescue standbys since 1992 and can handle this service for you. We will take the liability away from you and place it on us.

Our primary goal is the safety and well-being of your employees. We provide trained rescue technicians at your entry site capable of doing a confined space rescue and administering initial medical care if needed.

Stand By Coverage

We can also serve as Fire Watch, Attendant, and Supervisor if needed.

Call us for pricing.
