

Exploring PO circularity in food contact

Dario Dainelli

Consultant supporting PCEP,
Senior advisor EUPC

Packaging is largest PO demand segment

PO demand by market segment 2018

PCEP Roadmap 2030

Working on concepts for recycled polyolefins in food contact materials

- Overview of situation - current rules and barriers to use
- Proposal of PCEP activities in this area e.g. proof of concept projects, technical input to advocacy group for contribution to EU review of regulation

Initial activities

Acceptance for feedstock recycling – an advocacy activity

Understanding role of solvent recycling - Mapping of solvent recycling technologies and status

Starting point for mechanical recycling authorisations - Mapping activity related to safety evaluation guidelines for PO (e.g. an industry standard challenge test)
