

Introducing

The future of Nappy Recycling

A pioneering, environmentally-friendly
solution for Absorbent Hygiene waste

Innovative Process

- Operational since 2014
- Currently processing 9000 tonnes pa (45M nappies)
- Outputs of 3000 tonnes (dry)
- Patented process
- UK market size 1M tonnes

Process and outputs

Composite material containing PP, PE and Cellulose in multiple formats:

- Fibre
- Pellets
- Granules
- Powder

Output Market Development

- Composite fibre board
- Cement & aggregate fibre products
- Paper moulded products
- Enzyme digestion of cellulose to produce Glucose
- Wood Plastic Composites
- Fine Chemicals Refining
- Spill Absorbent Applications
- Insulation Products
