

BELTING MATERIAL

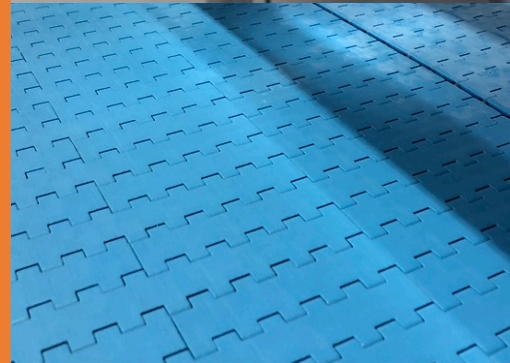

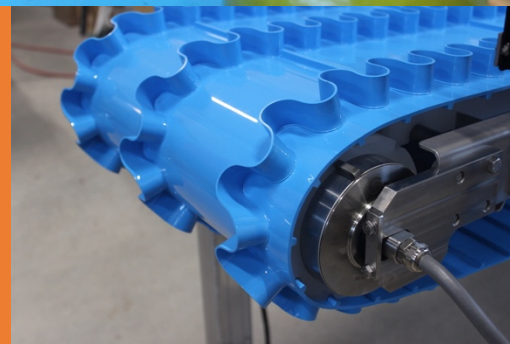

Innovative solutions to meet food safety, hygiene, high release, chemical resistance and other challenging operating requirements.

CONTINUOUS PLASTIC BELTING Offers superior hygiene and tracking. Available in a variety of colors, harnesses and profiles to suit your application

- Laced ends
- Cleats/flights
- V-Guides
- Corrugated sidewalls
- Hole punching
- Capped edges

PLASTIC MODULAR BELTING All standard materials are approved for direct food contact. Special materials/additives are available for challenging requirements

- High temperature
- High pulling force
- Easily replace damaged sections
- Non-stick

ELEVATOR HOPPER

FEATURES

- Available as an infeed or outfeed hopper
- Tilt-up hopper allows for quick and easy cleaning and belt removal
- Variable speed motor control sets the pace for the next operation
- Motorized pulley is hygienic, quiet and energy efficient
- Available in continuous single lace belt or modular belt
- Various cleat sizes and shapes
- Heavy-duty stainless steel construction
- 230V Three Phase

CUSTOM OPTIONS

All of our elevator hoppers are offered in a variety of options. Choose the hopper capacity, belt type, cleat size and hopper style. All of our elevator hoppers feature an Easy Clean design and variable speed controls to fine tune your production line.

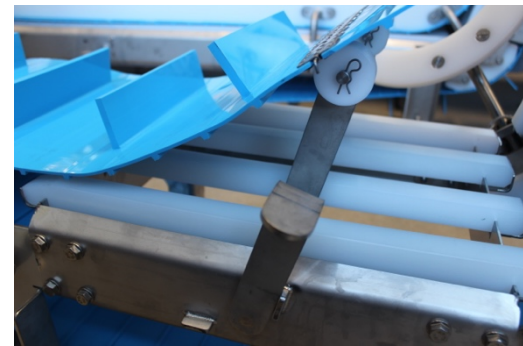

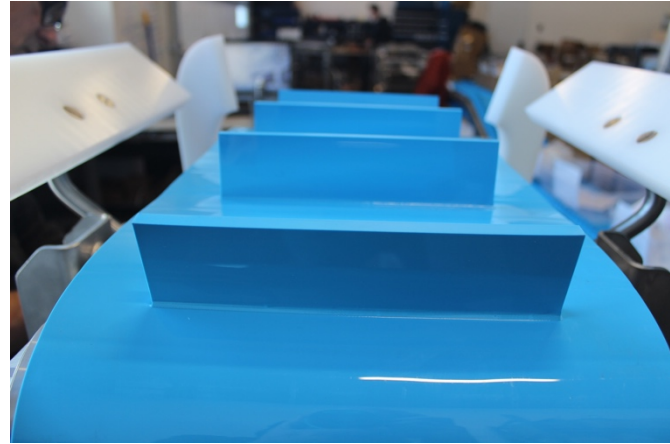

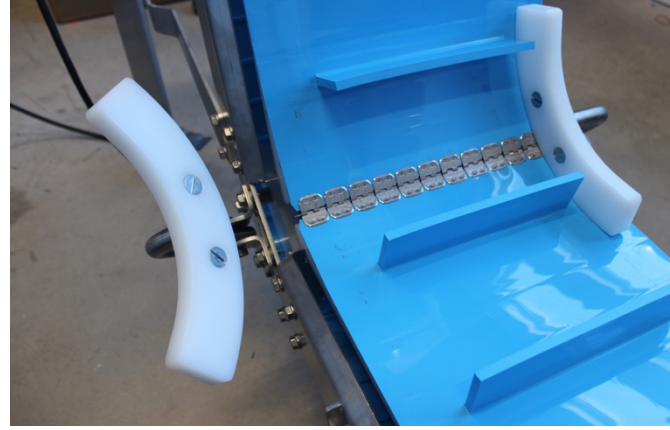

Motorized pulley. Hygienic, quiet and efficient

EASY CLEAN DESIGN

The Elevator Hopper features unique easy to clean design.

- Tilt out walls for easy belt removal
- Tilt up hopper for access to belt
- Flip up belt lifters to clean under belt
- Removable tray under machine to protect belt from splashes
- Single lace for quick belt removal, no tools required
- Operate belt in cleaning mode for easier cleaning of belt

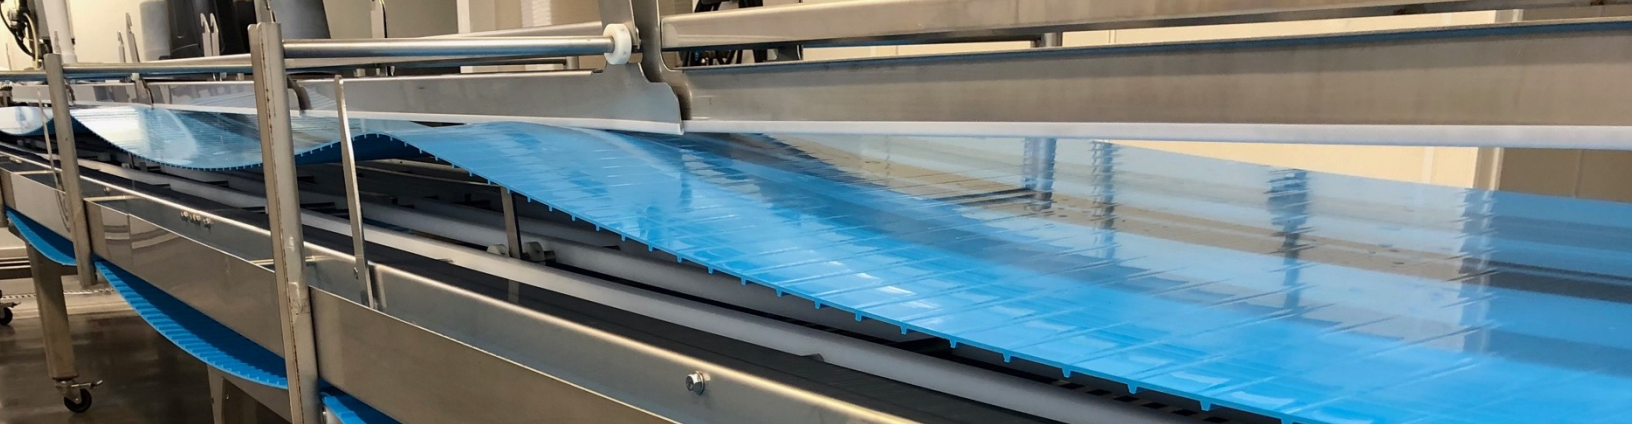

PICKING TABLES

CUSTOM OPTIONS

All of our picking tables are offered in a variety of options. Choose the overall length, width and belt type. You can also choose if adjustable lanes are required, or an overhead conveyor belt. Bin trays are also available. All of our picking tables feature an Easy Clean design and variable speed controls to fine tune your production line.

EASY CLEAN DESIGN

The Elevator Hopper features unique easy to clean design.

- Tilt out walls for easy belt removal
- Tilt up hopper for access to belt
- Flip up belt lifters to clean under belts
- Lane dividers easily removed or raised for cleaning mode
- Single lace for quick belt removal, no tools required
- Operate belt in cleaning mode for easier cleaning of belt

FEATURES

- Angled infeed doesn't require an infeed hopper on most equipment
- Multiple adjustable lanes on main conveyor belt
- Variable speed motor control sets the pace for the next operation
- Side lanes for waste product removal with independent speed control
- Available in continuous single lace belt or modular belt
- Various cleat sizes and shapes
- Heavy-duty stainless steel construction
- 230V Three Phase

ELEVATOR CONVEYOR

Elevator conveyors are the perfect addition to move product or waste away from processing areas.

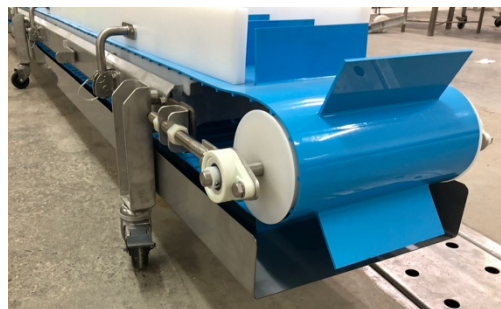

CUSTOM OPTIONS

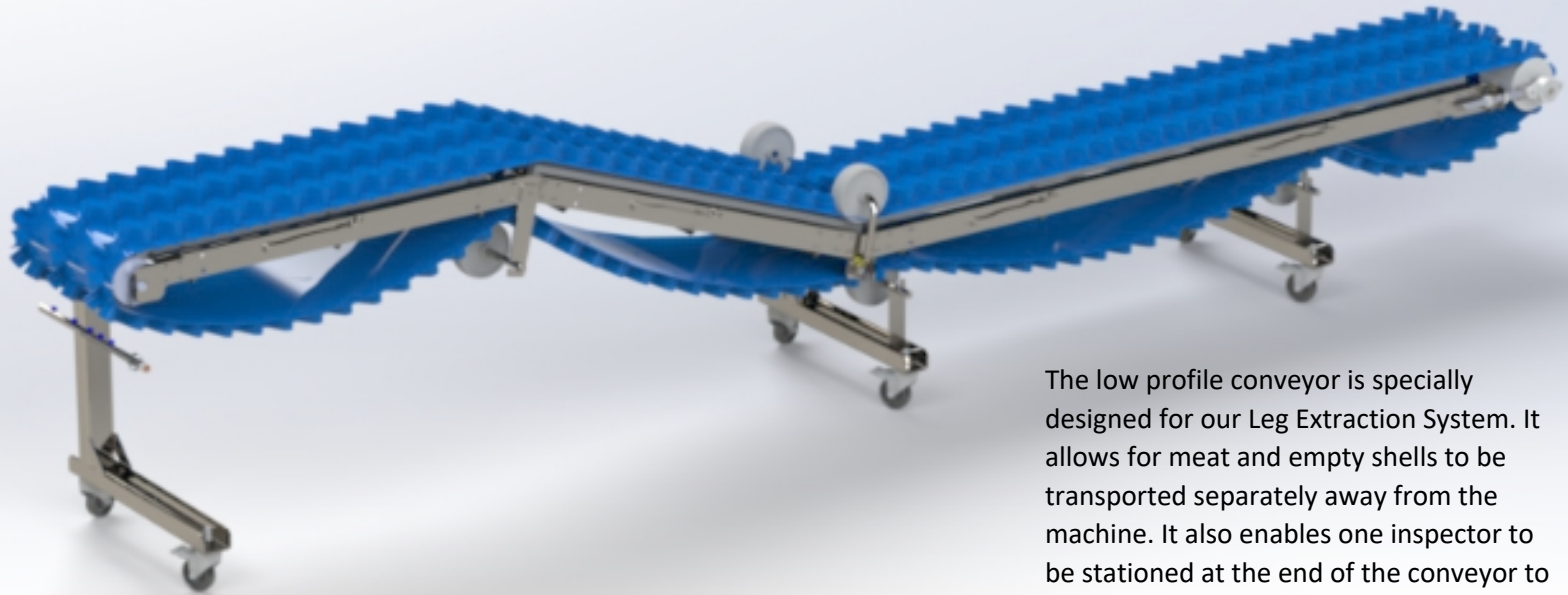

All of our elevator conveyors are offered in a variety of options. Choose the conveyor length and height, belt type and cleat size. All of our elevator conveyors feature an Easy Clean design with tilt-out side walls and belt lifters. Belt wash bars available.

FEATURES

- Variable speed motor control sets the pace for the next operation
- Available in continuous single lace belt or modular belt
- Heavy-duty stainless steel construction
- 230V Three Phase

LOW PROFILE CONVEYOR

The low profile conveyor is specially designed for our Leg Extraction System. It allows for meat and empty shells to be transported separately away from the machine. It also enables one inspector to be stationed at the end of the conveyor to inspect for shells in meat.

EASY CLEAN DESIGN

Our low-profile conveyors feature an easy clean design. The single piece belt is easily removed through the open sided leg design. The conveyor also feature tilt-out rollers and belt lifters. Wash bars can also be added as an option.

FEATURES

- Variable speed motor control sets the pace for the next operation
- Available in continuous single lace belt or modular belt
- Heavy-duty stainless steel construction
- 230V Three Phase
