

## FOOD GRADE MATERIALS

All our barriers are constructed from heavy gauge stainless steel and clear polycarbonate Lexan. Panels can be easily removed for deep cleaning.

## MAINTAIN OUTPUT

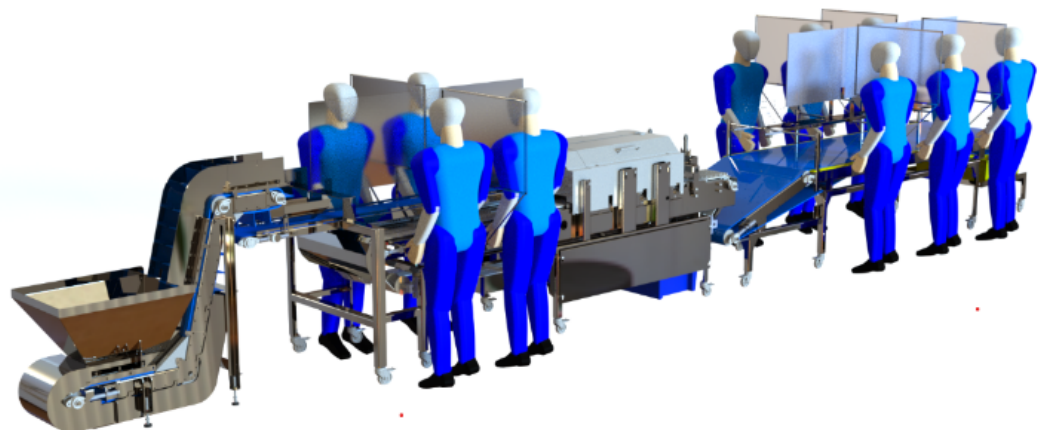

We can work with you to design barriers to create the minimum amount of disturbance to normal product flow.

## CUSTOM DESIGN

We can custom design our barriers to perfectly fit your equipment or working environment. We offer both standard and custom size panels.

## Protect your employees and your business

Help stop the spread of infectious disease by installing Personnel Protection Barriers in any workplace area where two or more employees may come into close contact. Area 52 will work with you to design custom barriers that will minimize interference with normal workflow while maximizing protection.

# MEETING SPACE BARRIERS

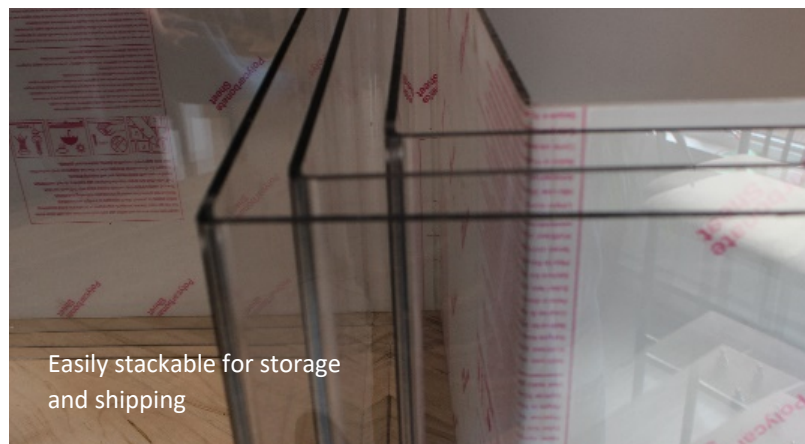

## Simple Design

Each piece is made from thick polycarbonate Lexan. One piece separates two individuals. Simply join multiple pieces together and quickly create a safe workspace for your employees.

## Versatile Materials

The clear Lexan allows each team member to see each other in meetings or around the lunch table. It also works well in production environments and is completely food safe and wash down friendly.

Easily stackable for storage and shipping
