GDPR and Manufacturers

Most companies do not realize the seriousness of the legal requirements and fine around the personal information of persons in Europe. If you **do** business with people in the EEA, note this doesn't mean you have a site there, just that you provide products or services and collect information, then the law and its penalties apply to you.

How 3Comply can help:

- With well experienced staff certified by the International Association of Privacy Professionals - we are ready to help.
- Clearly identify risks, exposures, gaps
- Establish policies and procedures
- Implement training programs
- Perform Assessments
- Help with audit prep
- Walk hand in hand with you through the whole process

Do you have a GDPR exposure?

Are you working with privacy professionals who are certified experts concerning privacy in Europe?

3Comply can help!

"An ounce of prevention is worth more than a pound of cure"
