IN THE NEWS

**Model Anganwadis in Chikkaballapur District in partnership with
SELCO Foundation**

Phase 01 of the project is progressing well towards catering to children's psychological, physical, social, emotional and cognitive developmental needs.

Nivasa along with Panchayat Development Officers, the contractor and SELCO Foundation is working towards completing both the Anganwadis within timelines.

The CSEB machine sanctioned by the former CEO of Chikkaballapur District, is being used to make blocks for the Anganwadi at Kethenahalli village in S Gollahalli Gram Panchayat and we are happy with how beautiful the blocks look!

Foundation work at Kethenahalli village, S Gollahalli GP.

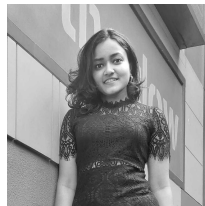

Foundation work at E-Thimmasandra village, E-Thimmasandra GP.

Foundation of both the Anganwadis are advancing towards completion!

Friends of Nivasa

We have an enthusiastic team of volunteers from all over India working with us...

Meghna Koushik from M S Ramaiah Institute of Technology.

"Working with Nivasa has been an enriching experience for me. The architects at Nivasa constantly underscore the value of purpose in architectural design."

Nivasa has accurately identified crucial target groups in both rural and urban areas thus making their service extremely relevant to the regional context. I am grateful for the volumes of information I learned during my research about Construction Labour Communities and their pressing need for humane living conditions. I look forward to continuing to work closely with the team at Nivasa to realize our combined dream of creating better spaces for the less fortunate by making one little difference at a time".

Melanie Marshal from School of Planning & Architecture, Bhopal.

"Working at Nivasa was an incredibly valuable and enriching experience for me. I was thrilled to be able to contribute to the projects that not only impact the community but also stand for a larger cause. It was eye-opening, and an approach to architecture that I hope to carry forward in my work.

The team was very welcoming and I am glad to have been able to participate and share my ideas freely. I am thankful for the responsibilities given and for the opportunity to learn the process and its challenges.

The best part was understanding how a simple contribution in design can really go a long way".

Shraddha H from KLE Technological University, Hubballi.

Aishwarya Arun from BMS College of Engineering, Bangalore.

Pranav Mitra from Manipal School of Architecture and Planning.

Invana Franziska Mayer from Marbury, Germany has completed her Masters in Architecture from Beuth University of Applied Sciences, Berlin.

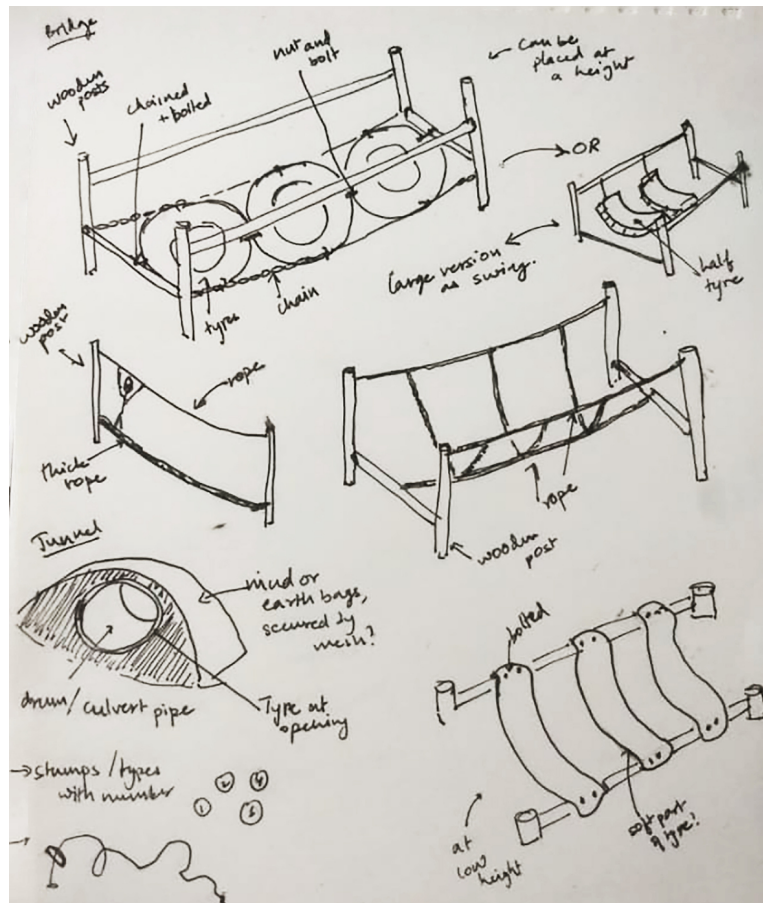

Jayapriya is a law graduate working with us on our Construction Labor Communities.

Madhuri S from R V College of Architecture.

They have come together as a team to design play areas for both the Anganwadis and they are also individually working on various tasks like construction manuals and research on labor laws, vernacular construction technologies and set of operations.

Conceptual sketches for the play area
