

Enabling humane and dignified living conditions,
for the rural and urban poor, through design.

KATTADA TIMES

Issue 34, January 2021

Happy New Year!

SPOTLIGHT

We are launching in partnership with project ECHO (<https://www.echoindia.in>)

"I Care for Worker Welfare - Training the Trainers Series"
with the PM and EHS teams of leading real estate consultants JLL and leading
property agents Savills.

We look forward to reaching to more!

BMS College of Engineering, Bangalore has awarded a grant for our further
R & D in Rafter and Beam technologies.

IN THE NEWS

Project Suitcase at Manchenahalli

In 2019, the then District Collector of Chikkaballapur district, Mr. Anirudh Sravan was moved by the plight of the 20 tribal families living in dire conditions to allocate 1.5 acres of land in quick time. Through his initiative, the Tribal Department of Chikkaballapur reached out to Nivasa. We crowd sourced for this project and we are grateful to all the individual unsung donors for supporting this project!

We are happy to see home owners loving their new suitcase houses!

"Our main concern in this hamlet is, it is not safe for infants and new mothers. There is no protection from rain and winds. Thatch roofs leak and the floor is always damp. With these suitcase homes, we don't have to worry about rains for the first time in our lives! My daughter just had a baby and we are happy!"
- Mr. Sureshappa (House Owner).

More suitcase houses coming up!

We are aiming to complete 5 more suitcase houses soon!

Project Griha - Model Anganwadis in Chikkaballapur District in partnerships with Government, Selco Foundation and local Contractor

Despite unforeseen rains, construction at both the sites are well underway and we are excited about how it is turning out!

We are confident that these anganwadis which are designed to cater to child's developmental needs, will redefine how anganwadis are built in the region.

Both the Gram Panchayat officials have taken it upon themselves to ensure smooth running of the project. The anganwadi teacher visits site everyday and starts the day with a prayer and tea for workers!

Any project is a success only when it is owned by the end-users and the local community!
