

Introducing

**ask**

August 2024

# Accelerating Potential

How do you share best practices, policies and frameworks for technology delivery in your organisation?

Can you take knowledge out of senior heads and share it with everyone, to improve consistency and risk management?

How do you protect your IP in a world where that differentiates you from the competition?

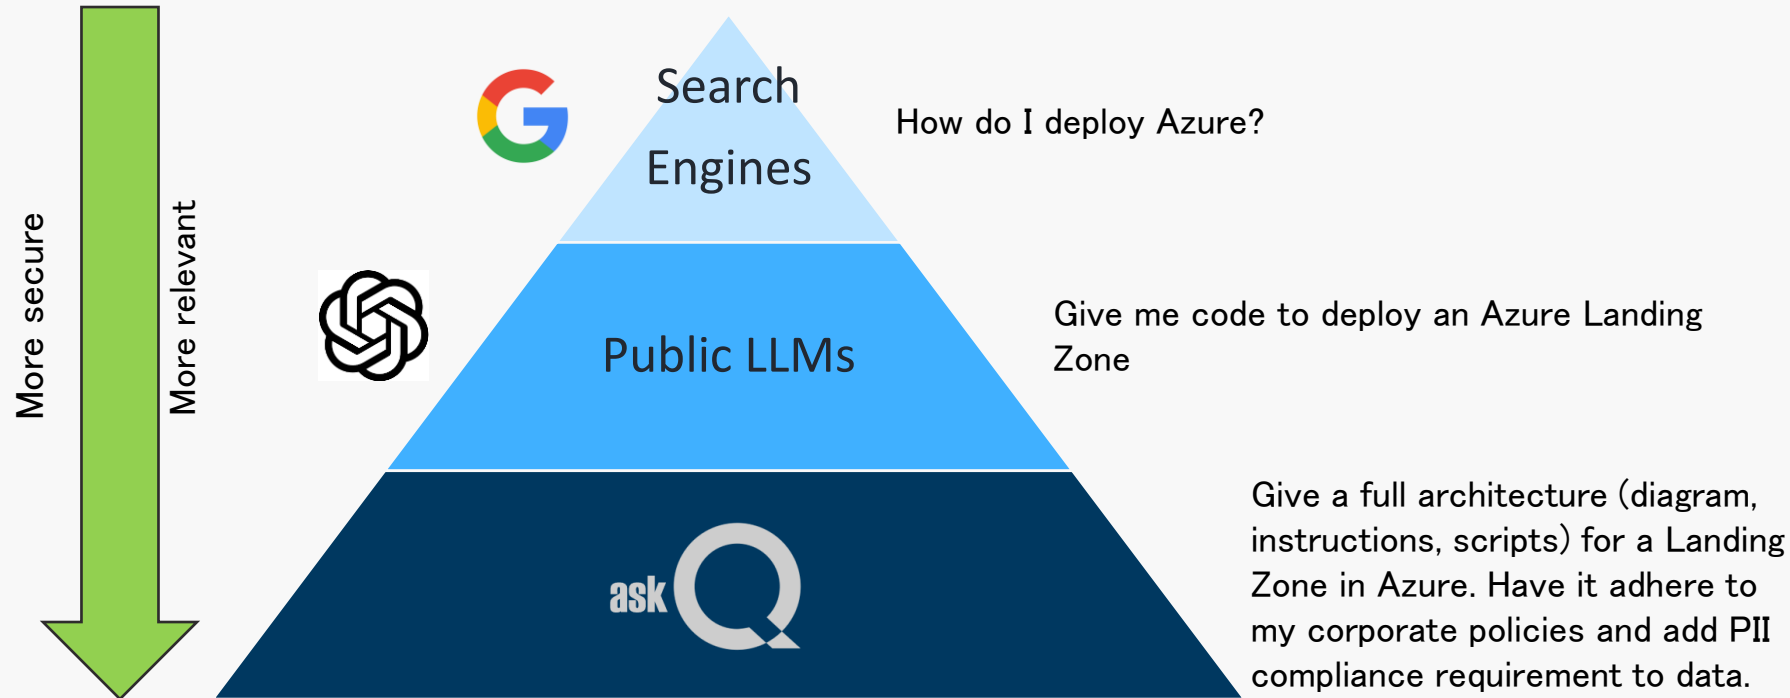

# Introducing **ask** from Qualyfi

A secure, private and customised LLM service agent for technology delivery and consulting

# LLMs are amazing but –

they lack controls for security, governance, consistency and quality.

Qualyfi

Our IP

Your policies, designs,  
frameworks

Curated Internet Sources

ask Q is:

Secure

Consistent

Appropriate

Qualyfi

# AskQ

The service offers a natural language consolidation of three key information sources:

1. All of the Qalyfi IP for consulting and delivery skills.  
This includes our unique syllabus to develop outstanding technology consultants.
2. Your specific frameworks and policies for best practice.
3. Selected and curated information from trusted sources on the Internet

AskQ

+ New Thread

### 5. Configure Security and Governance

#### PowerShell Script to Apply Azure Policies

```

powershell
# Variables
$companyPrefix = "contoso"
$resourceGroupName = "${companyPrefix}-rg-hub-spoke-network"
$policyAssignmentName = "${companyPrefix}-enforce-tagging"
$policyDefinition = Get-AzPolicyDefinition | Where-Object { $_.Properties.DisplayName -eq "Require a tag on resources" }

# Assign Policy to Resource Group
New-AzPolicyAssignment -Name $policyAssignmentName -DisplayName "Enforce Tagging Policy" -Scope "/subscriptions/{subscription-id}/resourceGroups/$resourceGroupName" -PolicyDefinition $policyDefinition

```

By using these updated scripts, you can deploy a foundational Azure Landing Zone that adheres to Contoso's policies and standards. Adjust the scripts further as needed to fit any additional specific requirements for Contoso.

Qualyfi IP

Microsoft Learn

AskQ takes information from curated sources and supplies the correct answer for your company, for your projects with your customers. It includes citations so you can check the source of the answer.

# Benefits of AskQ

## Security

- Do not share any of our data (questions, documents) with external sources
  - How much of your IP are your teams giving out to 3rd parties? What happens to that information?

## Policy

- Give people the answer that meets your company objectives and policies.
  - Does the current online video library include specific policies for your delivery practices?
  - Does it keep updated?

## Access

- Democratise the access to training materials and make them easy to consume.
  - How do you currently share best practices from senior architects and leaders?

About Us

# About Qualyfi

**Our Purpose: why are we here?**

To build the future of the cloud technology ecosystem by enabling anyone to reach their true potential.

**Our Mission: what do we want to achieve?**

To build an elite community of technology talent.

# A proven team
