

Global Sourcing Specialist

YOUR GLOBAL PROCUREMENT PARTNER

A complete turnkey sourcing, manufacturing and logistics solution for Owners/Developers, Designers/Architects and Contractors

Our goal is to create a better system of project sourcing and procurement.

- We bring factories closer
 - We personally have built great relationships with overseas factories and their owners. This gives us incredible buying leverage which we pass onto our customers. We have no middle layer adding markups in this scenario.
 - We have the ability to design and fabricate with domestic and international partnerships for any of your custom projects.
- We leverage volume purchasing across our entire base
 - When we purchase a given category for one client, it gives us greater buying power on behalf of our other clients.

Tropicana Pool Remodel – May 2018

- Custom made, handcrafted #304 Stainless Steel fully functional Sunglasses with polycarbonate lenses and dichromatic tint. Powder coated in the clients specified color code. Originally expected to be built from plywood and painted due to budget concerns. We met the budget and delivered a far superior product.
