THE LEADING INDUSTRY OF HOOSICK FALLS

Walter A. Wood machines have carried the name of Hoosick Falls to the most distant parts of the world. They are responsible for its title "The Mower and Reaper City"

Every grass and grain growing country calls upon the Wood Company for a large part of its annual requirements in harvesting machines. The demand steadily increases.

The growth of Hoosick Falls has kept pace with that of the Wood Company.

Class "A" Return
Trap

Albany Steam Traps

Class "D" High
Pressure
Non-Return Trap

Four styles are made by this company, for all duties. Class "A" is a return trap for returning the condensation in heating systems to a boiler without the use of a pump or any other mechanical device, and it used to return the water to a boiler under pressure from a steam system, it will do all that can be done by the so-called Steam Loop at far less expense. Classes "B" and "D" are non-return Traps designated for very high pressures and have been used with great success in many steam plants. Class "C" is a non-return Trap for pressures under 100 pounds.

These Traps are the result of over THIRTY YEARS' practical experience directly in this line.

All joints are scraped and fitted metal to metal, no elastic packing of any kind being used in their construction. We will gladly send them to any responsible person on thirty days trial.

We also manufacture High Grade Steam Valves, and carry in stock both simple and duplex steam pumps. Send for special circulars.
