**January 29<sup>th</sup>, 2002**  
**Luger magazine list 016, rules of the game**

**Finally, list 016. As many of you may already know, I no longer function under the "honor" system if you received magazine list 016 you have paid for the list in advance. There are a few exceptions, but I know they had good intentions to pay their dues, maybe will send it now.**

**If you want to be included on list 017 when it becomes available, you will need to send \$12.00 right now. Well at least, before you forget about it. Each of you will probably notice, the price has increased \$2.00. Sorry about that, the cost to print, postage and all the duties required to assemble the magazine list have increased in price. Other than the profit margin of course. That aspect remains the same, zero is very close.**

**As I have indicated many times, you people (politically correct) need to send me Luger magazine numbers and descriptions. I can assure you that each list is becoming more difficult to produce. All you guys with that drawer full of magazine numbers need to help out a little, send the numbers. You might encourage your friends to subscribe and send their magazine numbers.**

**Remember, you guys are the player's I spend the money hunting for magazine numbers and descriptions and spend the time entering the data into the computer. But, I still need a lot of help. Remember what we have all said many times;**

**"SOME COLLECTOR MAY HAVE THE LUGER FOR YOUR MAGAZINE OR HE MAY HAVE THE MAGAZINE FOR YOUR LUGER"**

**Feel free to reproduce the data sheets and distribute at will,**

**We certainly need all the help and Luger magazine information that we can find.**

**Thanks,**

**Don Hallock**

### **Mauser Luger and magazine research**

January 30<sup>th</sup>, 2002 Luger magazine list 016

Reproduce and distribute these pages to friends or any who may have luger magazines not matching their pistol. The whole idea here is just one more effort to locate the lost magazine for somebody's Luger. The original thought was to trade a like magazine for the magazine you need. On the other hand, some people prefer to sell their magazines. However it goes, it certainly is not my intent to be the middleman in any Luger magazine trade or sale. My job is done when I provide you with the name and telephone number of the owner. Even though I was born on December 25<sup>th</sup>, I'm not Santa Claus. Consequently we must all share in the cost to find the numbers, pay the print shop, pay the kids who stuff the envelopes, and we certainly cannot forget the postmaster. I'm just the good guy who enters all the data into the computer.

The next list will be number 017, if you want this list to be mailed to you when I have at least four pages of numbers, you will have to send \$12.00 in advance. Like now, if your like me, you will most certainly forget. You will probably notice the increase in price for the next list. Unfortunately, everything associated with putting this Luger magazine list together has increased in price. What more can I say???

As always, I do need magazine numbers to continue this operation. I need some more help. As mentioned in the past and if at all possible, please distribute a copy of the data sheets to collectors at guns shows, or anyone with a Luger magazine. Encourage your friends to provide a list of their magazine numbers. He might have one you need.

#### **PLEASE READ THIS SHORT PARAGRAPH:**

Many of you have heard this story before. Anyway here we go again. Just maybe, we should title this story as "Jackpot, Close to home". Several years ago I insisted that a gun-show friend list all of his magazine numbers so they would be made available to collectors looking for a matching magazine for their Luger. While putting his numbers into the computer, I nearly fell off the chair. There, "LOOKING ME IN THE EYE" was an O-37 K-date Luger magazine number 451. WOW!!! I owned the Luger with the other matching magazine. The moral to this story is rather simple. Nobody knows where you will find that matching magazine. Maybe just a few miles away like number 451. Many people have found a match for their Luger.

A couple collectors have found two or three matching magazines for their Lugers. We know it works. Just last week, a collector was looking through the old Luger magazine lists and found the number - 2 - magazine for a Police pistol that he had recently purchased. He had the numbered holster and tool and the number - 1 - matching magazine. On an old list, he found the number - 2 - C.G. Haenel magazine number 4313 to complete his "Rig". Can you imagine, the owner still had the magazine after providing the number to many several years ago.

**GOOD LUCK**

# LUGER MAGAZINE DATA

## Instructions for completing the form

The number **1** always describes a nickel body magazine.

The number **2** always describes a blue body magazine.

The number **3** always describes an extruded type magazine with a concave pinned aluminum base and a **122-code** acceptance mark and **two stick eagle 37's** on the blue body. A stick eagle 37 is possible on the base.

The number **4** always describes an extruded type magazine with a concave pinned aluminum base and the **fxo** code, **two stick eagle 37's** on the blue body and an **upside down P08 mark**.

The number **5** always describes an extruded type magazine with a concave pinned aluminum base and the **fxo** code, **two stick eagle 37's** on the blue magazine body and a **right side up P08 mark**.

The number **6** always describes a magazine the same as the type **5** except the type **6** has a black plastic base, the **fxo** acceptance, **two se-37's** and a **right side up P08 mark**.

The number **7** always describes an extruded type magazine with concave pinned **numbered** black plastic base, **fxo** acceptance, **two stick eagle 37's** and a **right side up P08 mark**.

The number **8** always describes a **3, 4, 5, 6, or 7** with numbers on the lower spine of the magazine body. Usually found on late war "KU" pistols.

## Mauser Military examples

1-MM-O37	= O-37	- acceptance	1934 K-S/42 .
1-MM-B90	= B-90	- acceptance	1934 K-S/42 and early 1935 G-S/42 Lugers.
1-MM-DE1	= Drooped eagle 154	- acceptance	1935 G-S/42.
1-MM-DE2	= Drooped eagle 211	- acceptance	1935 G-S/42
1-MM-DE6	= Drooped eagle 63	- acceptance	G-S/42, 1936 or 1937-S/42
1-MM-S42	= S/42	- replacement	Any S/42
2-MM-DE6	= Drooped eagle 63 -	acceptance	1936-S/42 after the - M - block and 1937-S/42 until the - R - block.

**NOTE:** During the - M - block of 1936 the nickel magazine bodies changed to blue.

2-MM-SE6	= Stick eagle 63	- acceptance	1937-S/42, 1938-S/42, 1939-S/42 and 1939-42.
----------	------------------	--------------	--

2-MM-SE8 = Stick eagle 83 - acceptance 1938 and a few 1939 dates until the - R - block

NOTE: Check the size of the acceptance mark and inspector number during the 1937, 1938 and very early 1939-S/42 production. These magazines all had small or normal acceptance marks. By late 1939-S/42 and early 1939-42 Luger production, the 63 inspector number under the stick eagle started to grow on the magazine as well as the pistol. Note the growth of the - 63 -. SE-63 - SE-63 - SE-63. The actual size of the stick eagles remained relatively the same size; only the inspector number 63 became larger. This is extremely important information for me. On these magazines please report the inspectors number as small - medium - large. Remember guys only the 63 will grow. RE: 2-MM-SE6M or 2-MM-SE6L

2-MM-SE8 = Stick eagle 83 - acceptance 1938 and a very few 1939 lugers as late as the - r - block.

2-MM-SE5 = Stick eagle 655 - acceptance 1939-42 Lugers during and after the - W - block. 1940-42 mixed with the 3-MM-122 until the - d - block of 1940.

3-MM-122 = Stick eagle 37 and 122 - acceptance 1940-42, 41-42 (n and o) blocks 41-byf in the n, o, p and maybe the - r - block.

NOTE: This is the new extruded type blue body, concave pinned aluminum base with a C.G. Haenel 122 Code. In addition, to the new C.G. Haenel 122 code, the acceptance mark changes to two stick eagle 37's on the magazine body. These magazines appeared in January of 1940. Some early 122-code magazines will have a stick eagle 37 on the magazine base in addition to the body. Please make it clear to me if a stick eagle 37 is found on the magazine base and the body. If found on the base, normally they were located on the top center or center right of the base.

3-MM-122ET = The magazine has a stick eagle 37 on the top of the base as well as two on the body.

3-MM-122EC = The magazine has a stick eagle 37 on the center right side of the magazine base as well as the magazine body.

4-MM-fxo = New extruded blue body, however the C.G. Haenel code has changed from **122** to the new C.G. Haenel **fxo** code. The two stick eagle 37 acceptance marks remain however a new m mark is added. This mark is an **upside down P09**. No acceptance marks on the base of the magazine. These magazines are only common to the 41-byf Luger. Except, you might find a 41-42 or 41-byf in the very end of the - o - block with this magazine.

5-MM-fxo = Exactly the same as the type 4-MM-fxo except the P08 is now **right side up**. No acceptance marks on the base of the magazine.

6-MM-fxo = Still the same body, but the concave pinned aluminum base changed to concave pinned black plastic base.

7-MM-fxo = Still the same body with the concave black plastic base except the black plastic base numbered.

8-MM-fxo = Any one of the extruded blue body magazines with a number on the lower spine of the magazine base.

## NOW FOR THE DATA ENTRY FORM

CONTRACT: Army	=	Mauser Military	See above
Commercial	=	Commercial blank wood base, nickel body.	1-DWM-Com
Military DWM	=	Wood base numbered. Nickel body.	1-DWM.Mil
Military Erfurt	=	Wood base numbered and Erfurt crown, nickel body. Please indicate one or two Erfurt Crowns.	1-ERF.Mil
Kaiserliche Navy	=	Wood base concentric and numbered, nickel body.	1-KLH-Navy
Police	=	Wood base numbered with a 1,2,3 or 4. Nickel body.	1-Weimar-Pol
Police	=	Alum. base numbered with a 1,2,3 or 4. Nickel body (MM = Mauser Military for Mauser era)	1-MM-Pol
Police	=	Any Haenel marked magazine, describe in detail.	
		Rolled tin construction, bright nickel, Police 1,2 or 3.	1-CGH-Pol
		Extruded construction, spine logo & nickel-plated.	1A-CGH-Pol
		Extruded construction, side logo & nickel-plated.	1B-CGH-Pol
		Extruded construction, side logo & blue body.	2-CGH-Pol
		Extruded construction, convex pinned & blue body	3-CGH-Pol
		No logo on this magazine	
		Extruded construction, concave pinned & blue body	4-CGH-Pol
		No marks on magazine body	

NOTE: C.G. Haenel magazines. Many C.G. Haenel magazines will have a Haenel-Schmeisser inspector mark on the magazine base or the body. For example a scriptic - H -, sunburst - K, B, C, or D. on the base or a Eagle K, F, C or L on the body. Please include the information with the magazine information. Example 1A-CGH-Pol SB-K, etc.

Simson Police	Rolled tin nickel body with an aluminum base. These mags. will have an Eagle 6 or Eagle 46, S in a triangle Or just an S. Police number 1, 2, 3, or 4.	1-SIM-Pol
Simson Military	Same magazine but has no police numbers, maybe has a military +.	1-SIM-Mil
Reichsmarine	1934 K-date with an O 37 acceptance. - O - property - N - property_ 1935 G-date with a 154 or 211 or DE-63 acceptance mark and an N property number, maybe an X to indicate the second magazine.	1-MM-O37N 1-MM-O37O 1-MM-DE1N 1-MM-DE1O 1-MM-DE2N 1-MM-DE2O 1-MM-DE6N 1-MM-DE6O

Note: Reichsmarine changed to Kriegsmarine in early 1935.

Kriegsmarine	1936 through 1940, Identified by the N or O property number.	Same format
--------------	--	-------------

SUFFIX: Self-explanatory. No suffix = "ns" (no suffix) a through z.  
SERIAL NUMBER: One to four digits.

PROPERTY NUMBER: If the magazine has a N or O property number please include the information here.

ISSUED WITH: K-date through 41-byf. If you don't know, accurate date will provide enough information for me to determine the year of issue.

ACCEPTANCE MARKS: Erfurt crown, Simson 6 or 46, S in a triangle or just S, Police Eagle B, K, F, C and L. O37, B90, DE154, DE211, DE63, SE63 small medium or large, SE83, S655, SE37. Or any other mark not mentioned, please draw the mark on a sheet of paper.

MAGAZINE NO. Does the magazine have a police 1, 2, 3, or 4, does it have a military + or maybe a navy X. If no number + or X, the magazine is the number one magazine and was never marked.

BASE: Wood. Solid aluminum, concave pinned aluminum base (CCPA), concave pinned black plastic base (CCPP), convex pinned aluminum base (CVPA). On the convex or concave pinned magazine the retaining pin is placed through the center of the magazine base. The aluminum base is pinned to the magazine body.

BODY: Rolled tin or extruded type.

COLOR: Nickel or blue in color.

TYPE: See descriptions above.

OWNER: Everybody who sends me magazine numbers is assigned an owner code.

COMMENTS: As you see fit, but indicate condition "dog" to "perfect". Chipped, rusted, dented, nice, really nice, very nice or God damn nice.

**(425) 432-6665    fax (425) 432-6660    Email donh@oz.net**

Luger magazine list 016 has been modified slightly in order to identify and more clearly indicate the transition suffix letters. The "T" numbers indicate the transition period between one Luger production date to the next. This information will provide the Luger collector with the possible combinations that would fit within a transition. For example the "issued with" column may have a T-1 following the G-S/42 (G-S/42 T-1). For all practical purposes, let's assume the magazine serial number is 1456a and the magazine base has a B-90 acceptance mark. The T-1 indicates "transition number one" or the transition from the K-S/42 to the G-S/42 production. The magazine can only be original to one of these two pistols. During these changeover periods (transitions), I have no way to determine exactly which is correct. Therefore, I will include, in this case, a T-1 after the G-S/42 in the "issued with" column. In the event I list the magazine as a G-S/42 magazine and you have K-date number 1456a, my guess was wrong and you certainly have hit the jackpot.

**TRANSITION IDENTIFICATION NUMBERS**

- T-1            Indicates the transition from the K-date to the G-date in the - a - block.
  
- T-2            Indicates the transition from the G-date to the 1936-S/42 in the - f - and - g - blocks. A T-2 following the "issued with" column would indicate the magazine could have been issued with either a G-S/42 or a 1936-S/42.
  
- T-3            Indicates the transition from the 1936-S/42 to the 1937-S/42 in the - p - block. A few 1936-S/42 Lugers are reported in the - q - and - r - blocks. In this case the T-3 indicates either 1936 or 1937-S/42 might be correct.
  
- T-4            Indicates the transition from the 1937-S/42 to the 1938-S/42 in the - b - block Note: If any collector has a 1938-S/42 in the no suffix or - a - block, please send me a description of the Luger. Once again the T-4 indicates the magazine could be correct for either 1937 or 1938-S/42.

- T-5 Indicates the transition from the 1938-S/42 to the 1939-S/42 in the - n - block. The first 2500 pistols in the - n - block were most likely 1938 dates. The T-5 will alert the collectors to magazines between 2500 and 9500. During this period the magazine could be common to either Luger.
- T-6 Indicates the transition from the 1939-S/42 to the 1939-42 during the - q - block. There is about a 50 - 50 chance that I will pick the correct pistol for the magazine during this period. Note: Mauser created a very few 1939-42 Lugers in the - p - block. "Food for thought", I have noticed the acceptance mark on the 1939-42 magazine base is larger than the acceptance mark on the 1939-S/42 magazine base.
- T-7 Indicates the transition from the 1939-42 to the 1940-42 in the - y - and - z - blocks.
- T-8 This transition becomes a little more difficult. The 1940-42 production ended in the - n - block. This transition includes the 1940-42, 41-42 and the 41-byf. The first part of the - n - block until about 2500n is nearly all 1940-42 pistols. The high-recorded 1940-42 is number 6668n. Two 41-byf Lugers are recorded with the 1940-42 pistols prior to number 2500n. They are 710n and 1000n. The low 41-42 is 2765n. Most of the - n - and - o - blocks are 41-42 pistols with the 41-byf scattered throughout. Consequently your guess is as good as mine. The - p - block was all 41-byf pistols, the - q - and - r - blocks have a few 41-42 Lugers.
- T-9 Indicates the transition from the 41-byf to the 42-byf in the no suffix and - a - block. The early - b - block has a few 41-byf Lugers. I have recorded 27b, 735b and 1048b.
- Thought: Don't just check the "issued with" column during your hunt for a matching magazine. Search the serial number, suffix, acceptance mark and magazine type and then compare to the "issued with" column. Think transitions, These are only magazines and I have no way to determine "what went where" within the many transitions. Nobody's perfect.

Luger Magazine list 016. Printed and mailed in January 2002.  
 Don Hallock - P.O. Box 370 - Hobart, WA 98025 (425) 432-6664
