WEIMAR AND EARLY NAZI LUGERS AND THEIR ACCESSORIES a new classic book prepared with the help of the world renowned members of the National Automatic Pistol Collectors Association. It contains information and photographs from the world's most important Luger collections (from Alaska, Australia, Belgium, Canada, Germany, Great Britain, France, New Zealand, and the United States). Covered in detail with much new information are the Army, Navy and police Lugers of Weimar Germany, their holsters, magazines, loading tools, cleaning rods, conversion units and literature. Imperial and Weimar Lugers reworked during the Nazi Era, Weimar commercial Lugers and Dutch Lugers are also covered. New historic information and the turmoil of the Weimar and Early Nazi Eras are related directly to the production of Lugers at DWM, BKW and Mauser. Much new information is presented on Simson Lugers. Weimar Era Lugers remained in service during the Nazi Era and were used by the formidable German military and police during World War II. Over 130 Luger variations are described with text and over 550 photographs. Six pages are in full color. Replaces all previous Luger references.

Specifications: highest quality hard cover, 8 1/2 x 11 inches, and 326 pages.
