*Empowering Merchants to Accept Crypto Payments Seamlessly.*

# ***Bitflow: The Future of Payments***

**Bitflow** was founded on the belief that payment systems should evolve with technology —faster, more transparent, and designed for the digital economy.

Our platform enables merchants to accept cryptocurrency payments while receiving settlements in fiat, removing volatility and technical barriers.

**Bitflow** delivers instant conversion, regulatory compliance support, and simplified integration for online and retail businesses worldwide.

We provide merchants the tools to future-proof their business in the digital age.

- *Seamless crypto-to-fiat settlement*
- *Instant transaction confirmation and conversion*
- *Integrated KYC, AML, and compliance support*
- *Global coverage with fiat payout options*

# Crypto Payments are Accelerating Worldwide

*A rapidly expanding multi-trillion dollar market opportunity*

The global shift toward digital assets continues to accelerate as consumers demand borderless, real-time payment options. Blockchain-based payments are transforming financial infrastructure, allowing businesses to operate globally without intermediaries or legacy friction.

More than **\$50 billion USD**  
in **crypto** transactions  
processed daily

Over **3 million crypto**  
transactions  
processed per day

Market expected to  
exceed **\$4.5 trillion**  
by **2030**

## ALREADY ACCEPTING CRYPTO

**75%** of global merchants  
plan to **enable**  
**crypto payments** by 2028

**Over 600 million people**  
hold cryptocurrency globally

# Bitflow Opportunity

- Increase revenue by tapping into a growing digital-asset customer base
- Accept multiple cryptocurrencies and stablecoins with instant fiat conversion
- Lower transaction costs and eliminate chargebacks or fraud
- Enable global payments for both online and retail sales

- Asset Management

# KYC, Source of Funds & AML

Prior to allowing your customer to complete the transaction, the **Bitflow** platform completes the following KYC and AML steps on the transaction level.

- Confirm client's identity through ID verification process which checks government issued ID and runs liveness detection
- Client is run against 1,000 global government databases to check for sanctions and PEP status
- Client submits source of funds attestation
- This feature is available for invoices and eCommerce

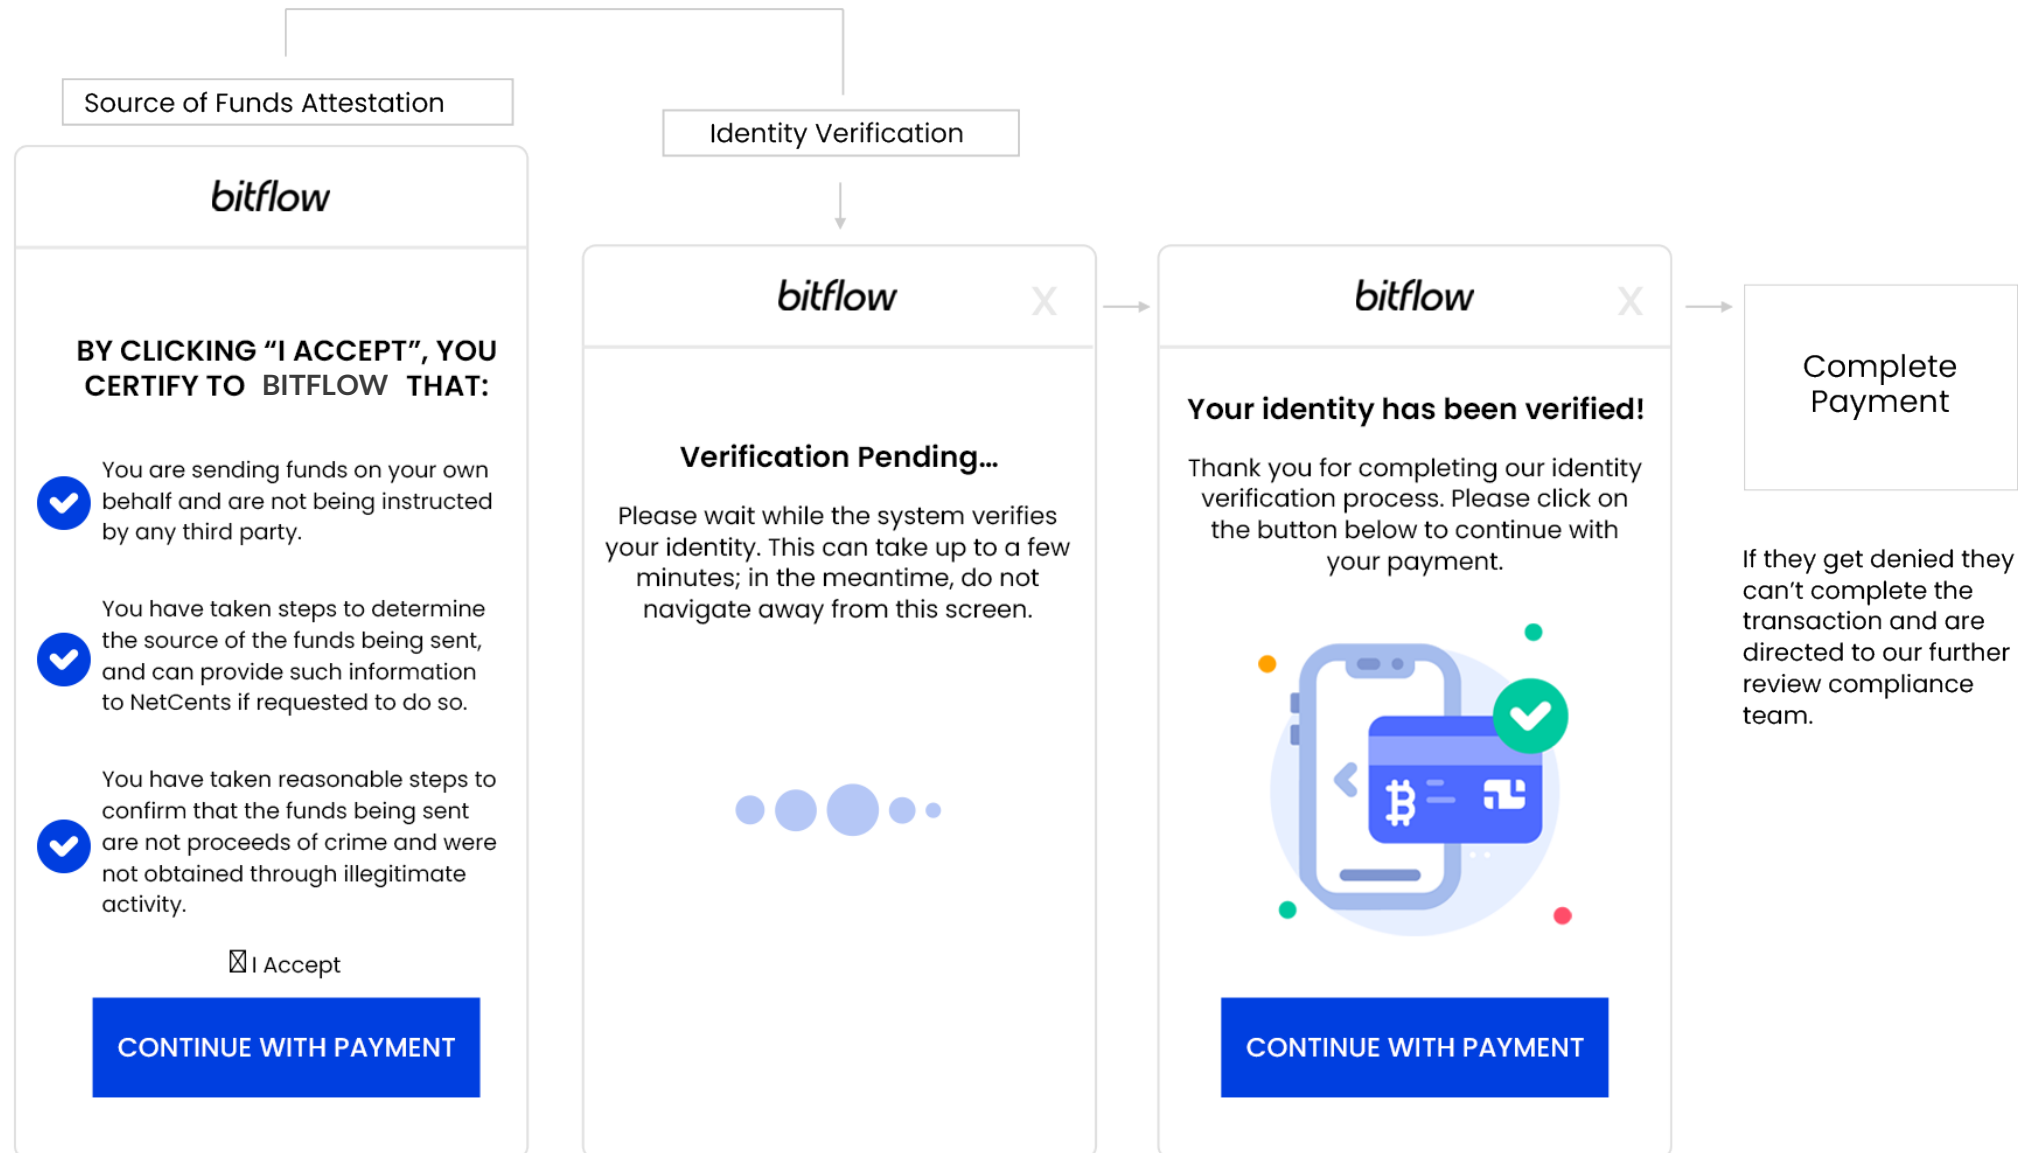

## Post Transaction AML Verification

Next generation crypto threat detection, risk management and compliance, cryptocurrency source of funds monitoring.

- Crypto crime investigation
- Transaction screening & wallet monitoring
- Enhanced due diligence & entity reporting
- Crypto compliance & investigation training

*If the risk probability analysis score exceeds our risk threshold, the funds are segregated, a compliance ticket is created and the compliance team then investigates the source of funds of the transaction prior to the funds being paid out.*

# Pre Transaction Verification
